

# Solicitations Look Ahead

*Note: This list is developed from preliminary information provided to the Consultant Selection Office. It is updated monthly based on current information and funding availability. Individual assignment information is subject to change prior to issuing a solicitation. In most cases, the solicitation will be issued within 3 months of appearing on this list.*

*All inquiries regarding the information contained herein must go through the Consultant Selection Office. Contact with Department employees concerning any upcoming (or active) solicitations is NOT allowed.*

<u>CSO #</u>	<u>Assignment Description</u>	<u># of firms required</u>
2284	<p><b>Construction Engineering and Inspection Services (Road &amp; Bridge)</b></p> <p>The Department is seeking to engage one (1) consultant engineering firm to provide construction inspection services for the following project:</p> <p><b>Project No. 0063-633</b> – This project will provide safety improvements along Route 44 (Albany Avenue) in the City of Hartford. This project is scheduled to be advertised on November 9, 2016 with a scope code of “K”.</p> <p>It is anticipated the solicitation for these services will be advertised in November 2016.</p>	1
2285	<p><b>Design Services for Project No. 56-316 (Highway Design &amp; Bridge and Structure Design)</b></p> <p>The Department is seeking to engage one (1) consultant engineering firm to provide design services for the preparation of contract plans, specifications, estimates and other necessary documents for the resurfacing, bridge rehabilitation, and safety improvements along I-95 in the Town of Greenwich and City of Stamford.</p> <p>The proposed improvements consist of a comprehensive structural pavement rehabilitation to extend the service life of the facility and restore functionality of approximately 7.3 miles of I-95 from the New York state line in Greenwich to Bridge No. 00026 over Greenwich Avenue and the Rippowam River in Stamford. Additional improvements include bridge rehabilitation (minor substructure repairs, joints, membrane replacement, parapet/guiderail modifications, etc.) of approximately 26 bridges and upgrades to roadside appurtenances. The existing wearing surface performance and condition of the pavement is deteriorating and is not anticipated to remain serviceable after 2019 or 2020. Additionally, the underlying concrete pavement is 60 years old and is approaching its serviceable life.</p> <p>The selected consultant firm will perform the following tasks:</p>	1

- Preliminary and Final Design activities
- Regulatory permitting activities
- Other tasks as required for the completion of plans, specifications and estimates
- Design services during construction and other related engineering-construction support activity
