**Subject:** PLEASE SAVE THE CRIBARI BRIDGE

Dear Mr. Alexander,

Please repair and retain our beloved Saugatuck Swing (Cribari) Bridge. Widening, moving or destroying the bridge will cause more problems than those actions will ever solve.

Realize that any change to the bridge, or its approaches, threatens the environment on multiple levels. There will be added and heavier traffic that will pour out on to Greens Farms Road which is not designed to handle the heavier and additional vehicles. Noise pollution, air pollution and a very real physical danger to our children and other pedestrians are an outcome that can be counted on. In short, anything that would allow or encourage large trucks access on to the bridge and to the Greens Farms Road, would erode our quality of life and be destructive to the fabric of our family centered neighborhood.

New construction would pose an environmental threat to the delicate shore line of the Saugatuck. Most importantly, Eminent Domain would come into play, causing heart ache, loss of property, businesses and further damage to the water and shore line.

**PLEASE be sensitive to our fragile environment!! Be responsible. Do the right thing for our community. Retain and repair our beloved bridge.**

Best,  
S. Horowitz Phd
