

Replacement of I-95 Bridge over West River, New Haven

Project Number 92-522

Project Description:

This project entails the replacement of Bridge No. 00163, which carries I-95 over the West River between New Haven and West Haven. The bridge is nearing the end of its serviceable life, and will be replaced with a new, wider structure, extending to the south of its current location. Additionally, Interchanges 44 and 45 along I-95 will be reconfigured. The existing loop ramps for the two interchanges will be eliminated, and combined into one diamond interchange, while maintaining the level of access currently provided to all areas. The project also includes the construction of a four-lane roadway section connecting Ella Grasso Boulevard to Kimberly Avenue, and providing access to West Haven from the new interchange. The contract has been awarded to the Middlesex Corporation. Construction is underway.
