SECTION 1

CT 2011 MOTORCYCLE SAFETY OVERVIEW

Motorcycle Safety

The general goal of Connecticut's Motorcycle Safety Program is to reduce the number of injuries and deaths among motorcycle operators and passengers. Performance goals set during the previous planning period included;

- Decreasing the number of un-helmeted fatalities below the five year average of 33 (2004-2008) to 25 by 2012.
- Decrease the number of fatalities below the five year average (2004-2008) of 51 by 10 percent to 46 by 2012.
- Decreasing the percentage of fatally injured motorcycle operators with BACs greater than 0.00 from 39.5 percent in 2008 to 30 percent in 2012.

The latest available data from 2010 indicates that the three year moving average of un-helmeted fatalities is 35 (Graph 8). During the same time period, the three year moving average for fatalities was 53 (Graph 8). Un-helmeted fatalities over the last three years have remained largely the same while overall motorcycle fatalities have shown a decline in relation to total fatalities 16% or (52 out of 319).

This data also indicates that in 2010, 21 out of 52 (41 percent) of the fatalities tested had a BAC greater than 0.00. This is the highest since 2003. The three year moving average for this group is 38 percent, (Graph 9)

During Fiscal Year 2011, DOT's Connecticut Rider Education Program (CONREP) continued motorcycle rider safety training at fifteen locations throughout the State. Each location offered the Basic Rider Course (beginner), Intermediate Rider Course, and Experienced Rider Course. In 2011 CONREP continued a pilot program offering an additional course targeting advanced and sport bike riders who are over represented in State crash data.

To assure quality control, CONREP Quality Assurance Reporters monitored the program under the supervision of three chief instructors. In order to accommodate additional student demand, CONREP trained and certified ten new instructors. Preliminary data for 2011 indicates 6,043 students were enrolled in over 581 Connecticut Rider Education Program courses. Student tuition and motorcycle registration fees collected from Connecticut motorcyclists provided the majority of funding for the training program.

In January 2011 newly enacted state law requires motorcycle operator safety training for all new license applicants. CONREP experienced a substantial increase in students during the 2011 training season. CONREP trained over 6,000 students, a 20% increase from the previous year, largely in part to the new requirement.

Providing public information and education materials that promote safety is an important component of the motorcycle safety program. Motorcycle organizations and several Connecticut motorcycle dealerships helped in this effort by distributing the materials. The materials included information on training course availability, safe riding gear, alcohol and/or drug impairment, safe riding tips, and motorist awareness of motorcycles. One popular item was the State motorcycle-specific map that incorporates NHTSA motorcycle safety educational information. CONREP was also represented and promoted at several grassroots events. Preliminary estimates indicate that over 10,000 Connecticut motorcyclists received NHTSA and State motorcycle safety education and rider impairment informational materials during this reporting period.

CONREP previously used NHTSA funding to purchase two Safe Motorcyclist Awareness and Recognition Trainers (SMARTrainer). The SMARTrainer is an advanced, interactive instructional tool with standard motorcycle controls and realistic traffic situations. The SMARTrainer leads a rider through a computer simulated ride designed to develop and apply risk-management and crash avoidance strategies.

Instructors received training on SMARTrainer procedures and instructional applications. This team conducted successful presentations at numerous grassroots events throughout the State. A total of 87 events took place over the course of the year, where over 2100 people participated in the SMARTrainer exercises. The largest event was in January at the Hartford Motorcycle Expo.

CONREP used NHTSA funding to purchase 68 Suzuki TU250X motorcycles and 15 Yamaha Zuma scooters. These motorcycles and scooters are fuel injected and were necessary to keep up with the increasing student demand.

A successful statewide campaign, “Open the Throttle. Not the Bottle,” continued to address motorcycle rider impairment and the impact of alcohol, drugs, and

fatigue on riding ability. Funded by a NHTSA grant, the campaign was developed to increase awareness of the dangers of riding impaired, with a focus on fatal injuries, and to encourage safe motorcycle riding practices. The campaign Web site (www.ride4ever.org) contains impaired riding messages and includes downloadable ride maps, digital postcards, and articles. The site showed 26,000+ visits over the course of the year, with the bulk of them coming in the spring and summer. Partners in this Program include the American Motorcyclists Association, and the Connecticut Motorcycle Riders Association. The campaign continued throughout the year with public service announcements and campaign message events at motorcycle gatherings.

CONREP received fifth year Section 2010 motorcycle safety funding from NHTSA. These funds were programmed to support the expansion of motorcycle rider training courses during 2011. This includes the addition of new motorcycles and other training equipment necessary to allow the program to offer more safety classes for novice riders. Additional funding will also be reserved to support our efforts to reduce rider impairment fatalities.

During 2011, approximately \$432,550 of federal funds (\$250,950 of Sections 402, and \$181,600 of Section 2010) and a combined \$1,469,194 from both Connecticut's Motorcycle Safety fund and CONREP course fees were spent to accomplish these activities.

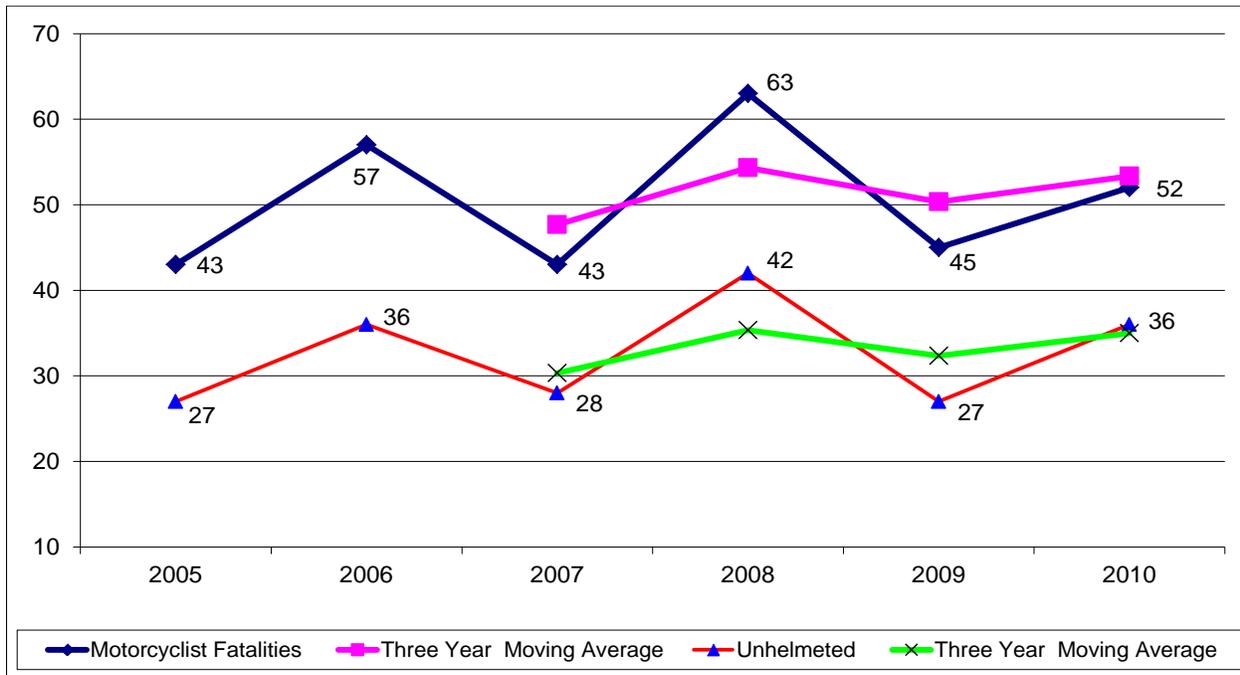

Graph 8

Graph 8 shows Connecticut's Motorcyclist fatalities. Both the number of fatalities as well as un-helmeted fatalities are shown. There were 52 Motorcyclist fatalities in 2010, 36 of which were un-helmeted. The graph data has been updated to reflect current numbers and may not correspond with some previously reported data.

2011 HSP Goal(s):

To decrease the number of fatalities below the five year average (2004-2008) of 51 by 10 percent to 46 by 2012.

To decrease the number of un-helmeted fatalities below the five year average of 33 (2004-2008) to 25 by 2012.

Outcome:

Both measures have fluctuated, but show a slight increase in their three-year moving averages over the reporting period. The three year moving average for motorcycle fatalities for 2008-2010 is 52 and the three year moving average for un-helmeted fatalities for the same period is 36.

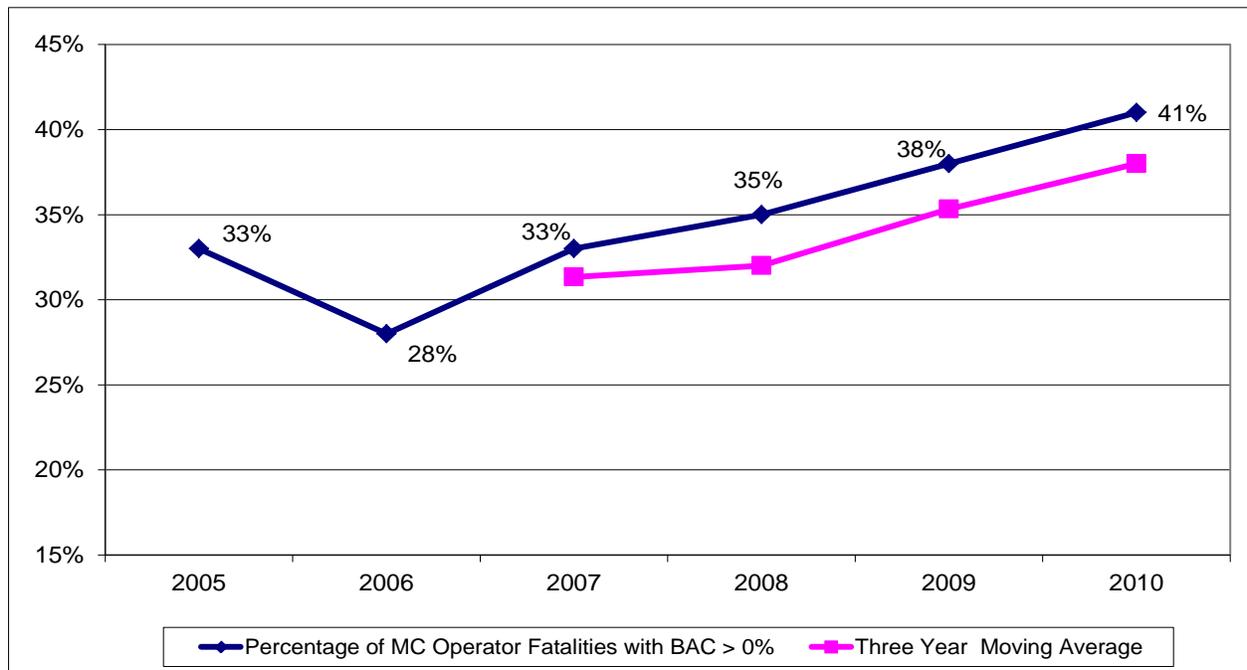

****Please note that data in this Report is sourced from the preliminary 2010 Connecticut FARS file. The data will be updated again in accordance with NHTSA-FARS standards and changes may be reflected during this update.****

Graph 9

Graph 9 shows Connecticut's Motorcyclist fatalities with a Blood Alcohol Content (BAC) greater than zero. Over 40 percent of all fatality injured motorcyclists had a positive BAC in 2010. The graph data has been updated to reflect current numbers and may not correspond with some previously reported data.

2011 HSP Goal(s):

To decrease the percentage of fatally injured motorcycle operators with BACs greater than 0.00 from 39.5 percent in 2008 to 30 percent in 2012.

Outcome:

Both motorcycle fatalities and the percentage of motorcyclists killed with a positive BAC has increased over the reporting period.

Please note that data in this Report is sourced from the preliminary 2010 Connecticut FARS file. The data will be updated again in accordance with NHTSA-FARS standards and changes may be reflected during this update.
