

# STATE OF CONNECTICUT

DEPARTMENT OF PUBLIC HEALTH

## MEMORANDUM

**DATE:** June 30, 2005

**TO:** Public Water Systems

**FROM:** Gerald R. Iwan, Ph.D., Section Chief  
Drinking Water Section 

**SUBJECT: PUBLIC WATER SYSTEMS VIOLATIONS REPORT - CALENDAR YEAR 2004**

The 1996 Amendments to the Safe Drinking Water Act (SDWA) include many provisions for making information on public water systems available to the public. One of these provisions requires the Department of Public Health (DPH), as the agency responsible for administering the SDWA at the state level, to issue an annual report on public water system violations. The report contains information on public water systems that incurred significant monitoring and reporting violations, treatment technique violations and exceedances of maximum contaminant levels during the calendar year 2004.

The complete report, along with a summary is available for review on the Department of Public Health, Drinking Water Section website ([www.dph.state.ct.us/BRS/Water/DWD.htm](http://www.dph.state.ct.us/BRS/Water/DWD.htm)) or at the Drinking Water Section offices, Department of Public Health, 450 Capitol Avenue, Hartford, CT.

If you have any questions about the summary or the full report please contact the Drinking Water Section at 860-509-7333.
