

Project Name: Data Sources for Sexual Violence

Project Description (max. 130 words):

*Please include desired outcome or product in your description.

Sexual Violence is one of the most underreported crimes in the US, and as such it is difficult to determine actual numbers of occurrences across the state. We need an accurate way to determine the rates of sexual violence in CT so that we can track if our prevention programs are having an impact. We need an intern to review all data sources of sexual violence in CT, including Uniform Crime Reports, Clery Reports from Colleges, Hospital and ER admission data, EMS data, YRBS data, BRFSS data, and sexual assault hotline data. We need to put together a code book of how each of these entities is collecting and coding sexual violence, and we need to develop a comprehensive assessment of the rates of sexual violence in CT in 2014 or as currently as is feasible. We also need to determine the actual perpetration rate given that sexual assault is so underreported, by reviewing the literature of how this is being estimated Nationally or in other states, and apply this to our rates here in CT.
