Registration 5:30-6:15 pm

Program 6:15-8:30 pm

Diabetes Disease Management Forum

Learn from the experts!

Program title- Diabetes Disease Management: The growing role of the primary care practice team.

Who should attend: Primary care providers, their office staff and diabetes educators. Continuing education credits will be provided for physicians and nurses.

Speakers/Topics Include:

Dr. Victor Villagra, President, Health and Technology Vector: Diabetes disease management: The state of theory and practice. This talk will be an overview of disease management and will discuss initiatives at the state/local/national level, resources providers/groups have, National Committee on Quality Assurance Provider recognition, and how pay for performance (P4P) is impacting the environment/trends.

Dr. Stephen Zebrowski, Chair of Clinical Practice at Pro Health: Disease Registries: How they can work for you. Dr Zebrowski will discuss the Pro Health experience with billing and lab data and how P4P has worked for Pro Health

Dr. Darren Anderson, Chief Medical Officer, CHC Inc.: Telephonic Disease Management in Community Health Centers. This presentation will cover the application of commercial models to underserved populations.

Dr. Thomas Meehan, Qualidigm : Qualidigm Initiative in Primary Care Offices
