

Rate of reported chronic/resolved hepatitis C per health department or district[^], Connecticut, 2009

Rate of reported chronic/resolved hepatitis C per 100,000

[^]Health Districts are defined towns, cities, boroughs united to form district departments of health and have a full time health director.

Number of confirmed chronic/resolved cases: 2124.
 Number of cases geocoded: 2041
 Range of geocoded rate per town or district: 0 - 157.
 Town of residence at first report.
 *Rate per 100,000 people based on 2008 census estimates.
 Chronic or resolved: a case with a positive anti-HCV result with a signal to cut-off predictive of a true positive as determined for the particular assay or confirmed with a more specific test (e.g. RIBA, PCR, genotype).
