***This table presents HIV Infection cases using the year the person was first diagnosed. The term HIV Infection is used to refer to three categories of diagnoses collectively:  
1 - persons with a diagnosis of HIV infection (not AIDS)  
2 - a diagnosis of HIV infection and a later diagnosis of AIDS  
3 - concurrent diagnoses of HIV and AIDS.  
Other/Unknown risk category includes perinatal exposure  
Data supplied from eHARS of cases reported through 2015***
