

How to Be Safe During a Power Outage

How to be sure your food is safe to eat when the power goes out

FOOD IN YOUR REFRIGERATOR AND FREEZER MAY BE UNSAFE TO EAT IF:

- The power is off for 4 hours or more.
- The temperature inside your refrigerator is at or above 45°F/ 7°C for more than two hours.

KEEP THE REFRIGERATOR AND FREEZER CLOSED

- Keep the door of your refrigerator/freezer closed during a power outage to keep it cold inside longer.
- **Refrigerated food** will be safe for no more than 4 hours.
- **Freezer full of frozen food** will be safe for no more than 48 hours.
- **Freezer half full of frozen food** will be safe for no more than 24 hours.

CLEAN YOUR REFRIGERATOR AND FREEZER AFTER A POWER OUTAGE

- When the power comes back on, clean out your refrigerator and freezer **BEFORE** you put new food in it.
- Wash the inside of the refrigerator and freezer with soap and warm water. Next, wipe the insides down with a mild solution of ½ tablespoon bleach in a gallon of water. Keep the refrigerator and freezer doors open to air dry.
- Once dry, close the doors and let it get cold inside the freezer and refrigerator before you fill it with food.

If you have a question about food safety **dial 2-1-1** or contact the Department of Public Health Food Protection Program at **(860) 509-7297** or go to **www.ct.gov/dph/foodprotection**.

The temperature of the food in your refrigerator must stay at or below 45°F/ 7°C to be safe to eat.

Keep the refrigerator and freezer doors closed!

When in doubt, throw it out!

Do not eat unsafe food.

- It can make you sick.
- You cannot tell if food is safe by the way it looks or smells.
- Throw away any unsafe foods.
- Cooking or reheating food will not make it safe to eat.

How to Be Safe During a Power Outage

Throw away these foods if held above 45°F/ 7°C for more than two hours
