

Recommended Reinspection Checklist for the Management Planner

Recommendations for response actions

- 1. Review the results of the original AHERA inspection, periodic surveillance records, and the reinspection.
- 2. Visit the school or take other necessary actions to recommend response actions to the LEA.
- 3. For each friable surfacing and miscellaneous ACBM and each asbestos-containing TSI reported by the inspector, make written response action recommendations.
 - 3a. Describe preventive measures and response actions for each assessment location of the ACBM.
 - 3b. Consider whether cleaning in accordance with procedures in 40CFR763.91(c) should be performed in each area and make appropriate recommendations in writing.
- 4. Include a schedule for beginning and completing the recommended cleaning and response actions.
- 5. Estimate the resource requirements for the recommended response actions.
- 6. Review the adequacy of the O&M Plan.

Recordkeeping

- 7. Record name, signature, date, and accreditation number and State (if applicable) on the reinspection form.
- 8. Submit written recommendations for the response actions to the designated person.
