Theo B. Terry, III, RS
President
Bear Onsite, LLC
P.O. Box 507
Somerville, TN 38068

Re: Bear Onsite Effluent Filters

Dear Mr. Terry:

This Department has reviewed your request for approval of four effluent filters that have designation numbers of ML3-910, ML3-916, ML3-925 and ML3-932. The Technical Standards for Subsurface Sewage Disposal Systems (Technical Standards) stipulates new septic tanks must be installed with an effluent filter that is approved by this Department. Approved effluent filters are listed in Appendix B of the Technical Standards. Your submission included technical drawings, specifications and product literature for the Bear Onsite effluent filters.

The information submitted documents the Bear Onsite effluent filters with the above noted designation numbers meet the minimum requirements in the Technical Standards for effluent filters. This Department hereby APPROVES the Bear Onsite effluent filters with the cited designation numbers. Attached is an updated Appendix B that includes the approved Bear Onsite effluent filters.

This approval will be emailed to local health officials, professional engineers, and to our Code Advisory Committee. This approval will also be posted on our program's website. This letter may be reproduced as a means of notifying other parties of this Department's approval. As with all product approvals, this Department's approval should not be considered an endorsement of the product.

Sincerely,

Robert W. Scully, PE
Supervising Sanitary Engineer
Environmental Engineering Program

C: Local Directors of Health
Chief Sanitarians
Code Advisory Committee
