DPH FUNDED EXPANDED SCHOOL HEALTH SERVICES

The state also provides limited funds to communities to enhance existing school health services. Services Vary by site and include but are not limited to: counseling, health education, health screening, psycho-social care and prevention services. They don't provide the full range of outpatient physical and mental health services such as those offered in a traditional School Based Health Center. Expanded School Health Services are available to enrolled students in schools where such services are provided.
