CDC and CMS are exploring options for measuring influenza and pneumococcal vaccination coverage of residents in nursing homes to track *Healthy People 2020* objectives. We would like to know:

- What priority (“High” or “Low”) does the AIC give to having vaccination coverage data *for each nursing home* in your state/area?
- If “high priority,” how would you use the data?
- Do you already collect influenza and pneumococcal coverage data from nursing homes in your state/area?
- Do you currently use or have you used “Nursing Home Compare” (<http://www.medicare.gov/NursingHomeCompare/search.aspx?bhcp=1>)? If so, does this resource provide or does not provide what you need?
