

# Lyme Disease Cases Statewide by Surveillance Method, Connecticut, 1991 – 2008\*

\* Numbers and rates reflect changes in the reporting system and the national surveillance case definition ([http://www.cdc.gov/ncphi/diss/nndss/casedef/lyme\\_disease\\_2008.htm](http://www.cdc.gov/ncphi/diss/nndss/casedef/lyme_disease_2008.htm)). Surveillance has included physician-reporting (1987-present) and laboratory-reporting (1998-2002, 2006-present) components.
