

Sec. 19a-36-A35. Standard tests for syphilis.

A standard laboratory blood test or a standard serological test for syphilis as required under the provisions of the general statutes or the public acts shall be a serological test approved by, and performed in a manner that meets the approval of the state department of health. The following types of tests are so approved: VDRL slide flocculation, fluorescent treponemal antibody absorption (FTA-ABS), automated reagin (ART) and rapid plasma reagin (RPR) circle card tests.

(Effective October 25, 1989.)
