Sec. 85. Section 19a-634 of Connecticut General Statutes:

(b) The office, in consultation with such other state agencies as the Commissioner of Public Health deems appropriate, shall establish and maintain a state-wide health care facilities and services plan. Such plan may include, but not be limited to: (1) An assessment of the availability of acute hospital care, hospital emergency care, specialty hospital care, outpatient surgical care, primary care, and clinic care; (2) an evaluation of the unmet needs of persons at risk and vulnerable populations as determined by the commissioner; (3) a projection of future demand for health care services and the impact that technology may have on the demand, capacity or need for such services; and (4) recommendations for the expansion, reduction or modification of health care facilities or services. In the development of the plan, the office shall consider the recommendations of any advisory bodies which may be established by the commissioner. The commissioner may also incorporate the recommendations of authoritative organizations whose mission is to promote policies based on best practices or evidence-based research. The commissioner, in consultation with hospital representatives, shall develop a process that encourages hospitals to incorporate the state-wide health care facilities and services plan into hospital long-range planning and shall facilitate communication between appropriate state agencies concerning innovations or changes that may affect future health planning. The office shall update the state-wide health care facilities and services plan on or before July 1, 2012, and every five years thereafter.

c) For purposes of conducting the state-wide health care facility utilization study and preparing the state-wide health care facilities and services plan, the office shall establish and maintain an inventory of all health care facilities, the equipment identified in subdivisions (8) and (9) of subsection (a) of section 19a-638, as amended by this act, and services in the state, including health care facilities that are exempt from certificate of need requirements under subsection (b) of section 19a-638, as amended by this act. The office shall develop an inventory questionnaire to obtain the following information: (1) The name and location of the facility; (2) the type of facility; (3) the hours of operation; (4) the type of services provided at that location; and (5) the total number of clients, treatments, patient visits, procedures performed or scans performed in a calendar year. The inventory shall be completed biennially by health care facilities and providers and such health care facilities and providers shall not be required to provide patient specific or financial data.
