Report of Independent Auditors

The Board of Directors
Saint Francis Care, Inc. and Subsidiaries

We have audited the accompanying consolidated balance sheets of Saint Francis Care, Inc. and Subsidiaries (Saint Francis Care) as of September 30, 2011 and 2010, and the related consolidated statements of operations and changes in net assets and cash flows for the years then ended. These financial statements are the responsibility of Saint Francis Care's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of Saint Francis Care, Inc.'s internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Saint Francis Care, Inc.'s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Saint Francis Care, Inc. and Subsidiaries as of September 30, 2011 and 2010, and the consolidated results of their operations and changes in net assets and their cash flows for the years then ended in conformity with U.S. generally accepted accounting principles.

A handwritten signature in black ink that reads 'Ernst & Young LLP'.

Saint Francis Care, Inc. and Subsidiaries
Notes to Consolidated Financial Statements

September 30, 2011

1. Significant Accounting Policies

Organization

Saint Francis Care, Inc. and Subsidiaries (Saint Francis Care) is a not-for-profit integrated health care delivery system. Subsidiaries of Saint Francis Care include: Consolidated Saint Francis Hospital and Medical Center (the Hospital and Medical Center), Mount Sinai Rehabilitation Hospital, Inc., Saint Francis Medical Group, Inc., Asylum Hill Family Medicine Center, Inc., Saint Francis Care Medical Group, P.C. and Saint Francis Hospital and Medical Center Foundation, Inc.

Basis of Presentation and Use of Estimates

The accompanying consolidated financial statements include the accounts of Saint Francis Care and subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the amounts reported in the financial statements and related footnotes. Actual results could differ from those estimates.

Temporarily and Permanently Restricted Net Assets

Temporarily restricted net assets are those whose use by Saint Francis Care has been limited by donors to a specific time frame or purpose. Temporarily restricted net assets consist primarily of contributions and grants restricted for certain health care services, medical research activities, and capital replacement. Permanently restricted net assets, which are primarily endowment gifts and assets held in trusts by others, have been restricted by donors and are to be maintained in perpetuity.

Donor Restricted Gifts

Unconditional promises to give cash and other assets are reported at fair value at the date the promise is received. The gifts are reported as either temporarily or permanently restricted support if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified as unrestricted net assets and reported in the consolidated statements of operations and changes in net assets as net assets released from restrictions. Donor restricted contributions whose restrictions are met within the same year as received are classified as unrestricted contributions in the accompanying consolidated financial statements.

Cash Equivalents

Saint Francis Care considers all highly liquid investments with remaining maturities of three months or less at date of purchase to be cash equivalents.

Investments

Unrealized gains and losses are included in the excess of revenues over expenses. Investments in equity securities with readily determinable fair values and all investments in debt securities are measured at fair value in the consolidated balance sheets. Fair value is generally determined based on quoted market prices. Alternative investments, which are investments with a non-readily determinable fair value, are stated at fair value as estimated in an unquoted market. Valuations of those investments and, therefore, Saint Francis Care's holdings may be determined by the investment manager and are primarily based on the valuation of the underlying securities. Investment income or loss, including realized gains and losses on investments, interest, and dividends, is included in excess of revenues over expenses unless the income or loss is restricted by donor or law. The cost of securities sold is based on the specific identification method.

Saint Francis Care considers all investments with remaining maturities of more than three months but less than one year at the date of purchase to be short-term investments.

Assets Whose Use Is Limited

Assets whose use is limited include assets set aside by the Board of Directors for the established purpose of providing for future improvement, expansion and replacement of property, plant, and equipment and for certain insurance liabilities, assets restricted by donors, assets held by trustees under bond indenture agreements related to financing activities with the State of Connecticut Health and Educational Facilities Authority (CHEFA or the Authority), and assets held in trusts by others. The portion of these amounts required for funding current liabilities is included in current assets.

Long-Lived Assets

Property, plant, and equipment are recorded at cost. Saint Francis Care provides for depreciation of property, plant, and equipment using the straight-line method in amounts sufficient to amortize the cost of the assets over their estimated useful lives.

Saint Francis Care, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

1. Significant Accounting Policies (continued)

Goodwill and intangible assets are amortized over periods ranging from five to twenty years using the straight-line method. Saint Francis Care periodically assesses the recoverability of the carrying value of its goodwill and intangible assets based on a review of projected undiscounted cash flows of the related operating entities.

Bond issuance costs are amortized over the life of the bonds using a method which does not differ materially from the effective interest method in the amount sufficient to amortize the cost over the term of the bonds.

General and Professional Liability Insurance

Saint Francis Care purchased claims made general and professional liability insurance coverage for the benefit of certain of its subsidiaries from a wholly owned insurance captive subsidiary. Saint Francis Care, in consultation with its actuary, records as a liability an estimate of incurred but not reported claims. Such liability, discounted at 4.0%, totaled \$5,381,189 and \$4,643,171 at September 30, 2011 and 2010, respectively.

Retirement Plans

Saint Francis Care has certain noncontributory defined benefit and defined contribution pension plans in effect covering all employees who meet certain eligibility requirements. For plans subject to the Employee Retirement Income Security Act of 1974 (ERISA), Saint Francis Care's funding policy is to contribute amounts to the plans sufficient to meet the applicable minimum funding requirements set forth in ERISA.

Excess (Deficiency) of Revenues over Expenses

The consolidated statements of operations and changes in net assets include excess (deficiency) of revenues over expenses. Changes in unrestricted net assets which are excluded from excess (deficiency) of revenues over expenses, consistent with industry practice, include permanent transfers of assets to and from affiliates for other than goods and services, contributions of long-lived assets and adjustments to the pension funding and postretirement obligations.

Income Taxes

Saint Francis Care and its principal subsidiaries are tax-exempt organizations under Section 501(c)(3) of the Internal Revenue Code. Tax provisions and related liabilities for certain taxable subsidiaries are not material to the consolidated financial statements.

Saint Francis Care, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

1. Significant Accounting Policies (continued)

ASC 740-10, *Uncertain Tax Positions*, prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, and disclosure requirements for uncertain tax positions. Management has evaluated the implications of ASC 740-10 and determined that its impact on the consolidated financial statements is not significant.

Saint Francis Care Medical Group has net operating loss carryforwards resulting in a deferred tax asset of approximately \$11,800,000, which is offset by a corresponding valuation allowance of the same amount.

Saint Francis Hospital and Medical Center has net operating loss carryforwards resulting in a deferred tax asset of approximately \$760,000, which is offset by a corresponding valuation allowance of the same amount.

Recently Issued Accounting Standards

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update 2010-06, *Improving Disclosures about Fair Value Measurements*, (ASU 2010-06). ASU 2010-06 amended ASC 820 to clarify certain existing fair value disclosures and require a number of additional disclosures. The guidance in ASU 2010-06 clarified that disclosures should be presented separately for each “class” of assets and liabilities measured at fair value and provided guidance on how to determine the appropriate classes of assets and liabilities to be presented. ASU 2010-06 also clarified the requirement for entities to disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. In addition, ASU 2010-06 introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Levels 1, 2 and 3 of the fair value hierarchy and present information regarding the purchases, sales, issuances and settlements of Level 3 assets and liabilities on a gross basis. With the exception of the requirement to present changes in Level 3 measurements on a gross basis, which is delayed until 2011, the guidance in ASU 2010-06 becomes effective for reporting periods beginning after December 15, 2009. The adoption of the provisions of ASU 2010-06 did not impact Saint Francis Care’s consolidated financial statements.

Saint Francis Care, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

1. Significant Accounting Policies (continued)

In January 2011, FASB issued Accounting Standards Update (ASU) No. 2010-07, *Not-for-Profit Entities: Mergers and Acquisitions*, (ASU 2010-07), which establishes accounting and disclosure requirements for how a not-for-profit entity determines whether a combination is a merger or an acquisition, how to account for each, and the required disclosures. In addition, ASU 2010-07 included amendments to FASB's Accounting Standards Codification (the Codification, or ASC) Topic 350, *Intangibles – Goodwill and Other*, (ASC Topic 350), and Topic 810, *Consolidation*, (ASC Topic 810) to make both applicable to not-for-profit entities. ASC Topic 350 clarifies the accounting for goodwill and indefinite-lived identifiable intangible assets recognized in a not-for-profit entity's acquisition of a business or nonprofit activity. Such assets are not amortized and are tested for impairment at least annually. Saint Francis Care adopted the guidance relative to ASU 2010-07 as of October 1, 2010.

In August 2010, FASB issued Accounting Standards Codification (“ASC”) 954-605, *Measuring Charity Care for Disclosure*. ASC 954-605 requires that the level of charity care provided be presented based on the direct and indirect costs of the charity services provided. ASC 954-605 also requires separate disclosure of the amount of any cash reimbursements received for providing charity care. ASC 954-605 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. Saint Francis Care is evaluating the effect of ASC 954-605 on its consolidated financial statements.

In July 2011, FASB issued new guidance, *Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts, and the Allowance for Doubtful Accounts*. The guidance requires certain health care entities to present the bad debt expense associated with patient service revenue as a deduction from patient service revenue (net of contractual allowances and discounts) rather than as an operating expense. The guidance is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2011, with early adoption permitted. Saint Francis Care is evaluating the effect of the guidance on its consolidated financial statements.

In August 2010, FASB also issued ASU 2010-24, *Presentation of Insurance Claims and Related Insurance Recoveries*. Under ASU 2010-24, anticipated insurance recoveries and estimated liabilities for medical malpractice claims or similar contingent liabilities will be presented separately on the balance sheet. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. Saint Francis Care anticipates that adoption of the guidance will increase total assets and liabilities and will not affect net assets.

Reclassifications

Certain 2010 amounts have been reclassified to conform to the 2011 presentation. Such reclassifications had no effect on the consolidated statements of operations and changes in net assets.

Subsequent Events

Saint Francis Care evaluated subsequent events through December 6, 2011 which is the date the financial statements were issued. No events occurred that require disclosure or adjustment to the consolidated financial statements. Saint Francis Care evaluates the impact of subsequent events, which are events that occur after the balance sheet date but before the financial statements are issued, for potential recognition in the financial statements as of the balance sheet date for the year ended September 30, 2011.

2. Net Patient Service Revenue and Charity Care

Net patient service revenue for the years ended September 30, 2011 and 2010 consists of the following:

| | September 30 | |
|-------------------------------|-------------------------|------------------|
| | 2011 | 2010 |
| Gross patient service revenue | \$ 1,750,522,789 | \$ 1,551,367,657 |
| Deductions: | | |
| Allowances | 1,047,531,631 | 893,144,762 |
| Charity care | 13,384,172 | 13,922,705 |
| | 1,060,915,803 | 907,067,467 |
| | \$ 689,606,986 | \$ 644,300,190 |

Patient accounts receivable and revenues are recorded when patient services are performed. Differences between amounts received from most third-party payors and the established billing rates of Saint Francis Care are accounted for as allowances.

Saint Francis Care, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

2. Net Patient Service Revenue and Charity Care (continued)

Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

During 2011 and 2010, approximately 42.2% and 42.8%, respectively, of net patient service revenue was received under the Medicare program; 12.3% and 10.7%, respectively, under the Medicaid program; and 17.6% and 18.0%, respectively, from Blue Cross. Laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation. Saint Francis Care believes that it is in compliance with all applicable laws and regulations, except for one matter which Saint Francis Care will voluntarily report to the applicable government agency. At this time, management does not believe the amount of the liability will be material to the consolidated financial statements. Saint Francis Care is not aware of any pending or threatened investigations involving allegations of potential wrongdoing that could have a material adverse affect on the consolidated financial statements. While no such regulatory inquiries are outstanding, compliance with such laws and regulations can be subject to future government review and interpretation as well as significant regulatory action, including fines, penalties, and exclusion from the Medicare and Medicaid programs. In addition, changes in the Medicaid and Medicare programs, the reduction of funding levels, or changes in interpretations or estimates could have an adverse impact on Saint Francis Care. During 2011 and 2010, Saint Francis Care recorded a net change in estimate of approximately \$1,000,000 and \$2,000,000, respectively, related to better than previously estimated third-party payor settlements.

Saint Francis Care accepts all patients regardless of their ability to pay. A patient is classified as a charity patient by reference to the established policies of Saint Francis Care. Essentially, these policies define charity services as those services for which no payment is anticipated. In assessing a patient's inability to pay, Saint Francis Care utilizes the generally recognized poverty income levels for the State of Connecticut, but also includes certain cases where incurred charges are significant when compared to incomes. In addition, all self-pay patients receive a 35% discount from charges which is not included in net patient service revenue for financial reporting purposes.

The significant concentrations of accounts receivable for services to patients include 25.0% from Medicare, 17.1% from Medicaid, and 34.7% from commercial insurance carriers and managed care companies at September 30, 2011 (22.8%, 14.0%, and 40.7%, respectively, at September 30, 2010).

| Assets held in trusts by others | 43,233,016 | 44,595,433 |
| Total assets whose use is limited | 103,392,191 | 137,501,195 |
| Less other assets that are required for current liabilities | 4,502,581 | 4,616,162 |
| | \$ 98,889,610 | \$ 132,885,033 |

The assets underlying the trustee held and Foundation funds are principally marketable equity securities, fixed income securities, government securities, and cash equivalents.

5. Donor-Restricted Endowment Funds

Saint Francis Care endowments include the donor-restricted endowment funds. Perpetual trust funds held by others are not included under ASC 958-205. Net assets associated with endowment funds are classified and reported based on the existence or absence of donor-imposed restrictions.

Saint Francis Care, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

5. Donor-Restricted Endowment Funds (continued)

Management of Saint Francis Care has interpreted the Uniform Prudent Management of Institutional Funds Act (UPMIFA) as requiring the preservation of the fair value of the original gift as of the gift date of the donor-restricted endowment funds absent explicit donor stipulations to the contrary. As a result of this interpretation, Saint Francis Care classifies as permanently restricted net assets (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time of the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted net assets until those amounts are appropriated for expenditure by the organization in a manner consistent with the standard of prudence prescribed by UPMIFA. In accordance with UPMIFA, Saint Francis Care considers the following factors in making a determination to appropriate or accumulate donor-restricted funds:

- 1) The duration and preservation of the fund
- 2) The purposes of Saint Francis Care and the donor-restricted endowment fund
- 3) General economic conditions
- 4) The possible effect of inflation and deflation
- 5) The expected total return from income and the appreciation of investments
- 6) Other resources of Saint Francis Care
- 7) The investment policies of Saint Francis Care

Saint Francis Care has adopted investment and spending policies for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment.

Changes in endowment funds for the year ended September 30, 2011 and 2010 consisted of the following:

| | 2011 | | |
|--|-----------------------------------|-----------------------------------|--------------------------|
| | Temporarily Restricted | Permanently Restricted | Total |
| | <hr/> | <hr/> | <hr/> |
| Net assets, beginning of the year | | \$ 4,066,461 | \$ 4,066,461 |

| Net assets, end of year | <u>\$ —</u> | <u>\$ 4,066,461</u> | <u>\$ 4,066,461</u> |

From time to time, the fair value of assets associated with individual donor-restricted endowments funds may fall below the level that the donor of UPMIFA requires Saint Francis Care to retain as a fund of perpetual duration. There were no significant deficiencies of this nature which are reported in unrestricted or permanently restricted net assets as of September 30, 2011 and 2010.

6. Long-Term Investments and Investment Income

Long-term investments consist of the following:

| | September 30 | |

| | \$ 266,003,820 | \$ 236,199,465 |

In November 1993, the Hospital and Medical Center entered into a financing arrangement with the Authority under a Master Indenture for the financing of a partial replacement facility and renovation of existing facilities. The Authority sold \$110,505,000 of Series C revenue bonds of which \$32,765,000 matured serially from 1997 to 2008, \$19,900,000 matures in the year 2013, and \$57,840,000 matures in the year 2023 with interest at a net average annual rate of approximately 4.8%.

In May 2002, the Hospital and Medical Center entered into a financing arrangement with the Authority under a Master Indenture for the purpose of defeasing all outstanding Series B revenue bonds. The Authority sold \$25,250,000 of Series D revenue bonds of which \$11,385,000 matured serially from 2003 to 2011, \$2,525,000 matures in the year 2013, \$5,040,000 mature in the year 2017, and \$6,300,000 mature in the year 2022 with interest at a net average annual rate of approximately 4.9%.

9. Long-Term Debt (continued)

During 2004, the Hospital and Medical Center entered into a synthetic refinancing of its existing Series C Fixed Rate Bonds. Through a series of transactions which involve a total return interest rate swap and a cash flow swap, the Hospital and Medical Center converted its old fixed rate debt to a lower fixed rate debt with substantial anticipated future savings.

In March 2008, a financial institution terminated its total return interest rate swap with the Hospital and Medical Center. As a result, the Hospital and Medical Center purchased the Series C Fixed Rate Bonds underlying the swap (\$38,870,000 out of a total of \$77,740,000). The Hospital and Medical Center financed the purchase of these bonds using a bridge loan with another financial institution. In May 2008, the Hospital and Medical Center entered into a financing arrangement with the Authority under a Master Indenture for the purpose of refinancing the bridge loan. The Authority sold \$39,745,000 of Series E revenue bonds through a private placement. The bonds mature serially from 2014 to 2027 and bear interest at a fixed rate of 6.105%. The Hospital and Medical Center subsequently entered into a synthetic refinancing of these bonds through a total return interest rate swap with a financial institution that lowers the fixed rate to 3.849% for the next five years.

In June 2008, the Hospital and Medical Center entered into a financing arrangement with the Authority under a Master Indenture for the financing of construction of a building containing a new emergency department, operating rooms and patient rooms and renovation of existing facilities. The Authority sold \$175,000,000 of Series F Variable Rate Demand Revenue Bonds which mature serially from 2028 to 2047. The bonds bear interest at a weekly rate as determined by the remarketing agent. The Series F bonds are required to be supported by a letter of credit which has been executed with a financial institution. In the event that the bonds cannot be remarketed, the underlying terms of the letter of credit agreement require that all amounts borrowed under the agreement be repaid ratably, over a 60 month period. Accordingly, that portion of the bonds which would be due within one year, should the bonds fail to be remarketed, is classified as a current liability. The letter of credit is scheduled to expire during 2014. Concurrent with the transaction the Hospital and Medical Center entered into an interest rate swap to effectively fix the interest rate on \$130,000,000 of the Series F bonds at 3.535%.

In November 2008, a financial institution terminated its total return swap with the Hospital and Medical Center on the remaining Series C Fixed Rate Bonds outstanding at September 30, 2008. As a result, the Hospital and Medical Center purchased \$38,870,000 of the remaining Series C Fixed Rate Bonds underlying the swap subsequent to its fiscal year end. In June 2009, a financial institution purchased \$8,150,000 of these bonds.

Saint Francis Care, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

9. Long-Term Debt (continued)

In September 2010, the Hospital and Medical Center entered into a financing arrangement with the Authority for the purpose of retiring the remaining Series C Fixed Rate Bonds which it purchased in 2008. The Authority sold \$29,870,000 of Series G Bond Qualified Tax Exempt Bonds which mature serially from 2011 to 2027 through a private placement. The bonds bear interest at a rate of 68% of one month LIBOR plus 2.75% (2.03% at September 30, 2011). The bonds are required to be supported by a letter of credit which has been executed with a financial institution. The letter of credit is scheduled to expire in 2015.

The Total Return Distribution Agreements and interest rate swaps between the Hospital and Medical Center and the financial institutions are considered derivative instruments and are marked to market in accordance with ASC 815. The fair market value of the swaps is included with other noncurrent accrued expenses in the accompanying consolidated balance sheets. Although the agreements and swaps represent economic hedges of the interest rate on the bonds, they do not qualify for hedge accounting treatment under ASC 815. The changes in the fair market value of the swaps and total return distribution agreements are reported in the accompanying consolidated statements of operations and changes in net assets as interest rate swap activity along with the net cash receipts on the swaps.

The Hospital and Medical Center's swap agreements provide for the interest rates at a level viewed as acceptable by the Hospital and Medical Center. Such agreements expose the Hospital and Medical Center to credit risk in the event of nonperformance by the counterparties.

Under terms of the financing arrangements, the proceeds of the revenue bonds were loaned to the Hospital and Medical Center by the Authority. Pursuant to the loan agreements, the Hospital and Medical Center is obligated to provide amounts which will be sufficient to enable the Authority to pay the principal and interest on the Series C, Series D, Series E, Series F and Series G bonds. The terms of the various financing arrangements between CHEFA, certain financial institutions and the Hospital and Medical Center also provide for financial covenants. As of September 30, 2010 and 2011, the Hospital and Medical Center was in compliance with such covenants.

9. Long-Term Debt (continued)

Concurrent with the issuance and delivery of the Series C, Series D, Series E, Series F and Series G bonds, the Hospital and Medical Center and the trustee entered into a master indenture and supplemental master indentures which provide for the establishment and maintenance of various funds, a pledge of gross receipts, as defined, restrictions on incurrence of certain indebtedness, and financial covenants. The balances of the funds established pursuant to the master indenture and supplemental master indentures were as follows:

| | September 30 | |
|----------------------------|---------------------|----------------------|
| | 2011 | 2010 |
| Debt Service Reserve Funds | \$ 4,320,755 | \$ 4,374,830 |

| Construction Fund | – | 26,328,070 |
| | \$ 6,157,072 | \$ 34,987,876 |

Annual maturities of long-term debt at September 30, 2011 are as follows:

| | Scheduled Maturities |
|------------|---------------------------------|
| 2012 | \$ 6,140,523 |
| 2013 | 6,539,811 |

| 2016 | 4,932,487 |
| Thereafter | 241,970,000 |
| | \$ 272,144,343 |

Interest payments of \$9,617,158 and \$10,740,324 were made during 2011 and 2010, respectively. Interest of \$3,130,950 and \$4,513,494 was capitalized during the years ended September 30, 2011 and 2010, respectively.

10. Retirement Plan and Other Postretirement Benefits

The Hospital and Medical Center has noncontributory defined benefit pension plans in effect covering all employees who meet certain eligibility requirements. Benefits are based on years of service and the employee's compensation and include a cash balance account for each employee. For plans subject to ERISA, the Hospital and Medical Center makes contributions in amounts sufficient to meet ERISA's minimum funding requirements.

Effective March 1, 2006, The Hospital and Medical Center amended its defined benefit pension plans to close the plans to new participants on September 30, 2006 and to freeze accruals as of October 1, 2006 for participants whose age plus years of service (minimum of ten years) total less than fifty-five. As of October 1, 2006, The Hospital and Medical Center established a defined contribution plan for all eligible non-grandfathered employees. Pension expense related to the defined contribution plan for the years ended September 30, 2011 and 2010 was \$10,940,751 and \$8,731,676, respectively. The defined benefit plan became fully frozen effective October 1, 2009.

The Hospital and Medical Center provides health insurance to retirees and spouses who have met certain eligibility and length of service requirements. The Hospital and Medical Center's policy is to fund the cost of those postretirement benefits as incurred.

Included in unrestricted net assets at September 30 are the following amounts that have not yet been recognized in net periodic benefit cost:

| | Pension Benefits | | Postretirement Benefits | |

10. Retirement Plan and Other Postretirement Benefits (continued)

Assumptions

The weighted-average assumptions used to determine benefit obligations at September 30 are as follows:

| | Pension Benefits | | Other Postretirement Benefits | |
|------------------|-------------------------|-------------|--------------------------------------|-------------|
| | 2011 | 2010 | 2011 | 2010 |
| Measurement date | 9/30/2011 | 9/30/2010 | 9/30/2011 | 9/30/2010 |
| Discount rate | 5.00% | 5.40% | 5.00% | 5.40% |

The weighted-average assumptions used to determine net periodic benefit cost for the years ended September 30 are as follows:

| | Pension Benefits | | Other Postretirement Benefits | |
|---|-------------------------|-------------|--------------------------------------|-------------|
| | 2011 | 2010 | 2011 | 2010 |
| Discount rate | 5.40% | 5.50% | 5.40% | 5.50% |
| Expected long-term rate of return on assets | 8.0 | 8.25 | – | – |

The Hospital and Medical Center's expected long-term rate of return on assets assumption is derived from a study conducted by its actuaries and investment managers. The study includes a review of anticipated future long-term performance of individual asset classes and consideration of the appropriate asset allocation strategy given the anticipated requirements of the plan to determine the average rate of earnings expected on the funds invested to provide for the pension plan benefits. While the study gives appropriate consideration to recent fund performance and historical returns, the assumption is primarily a long-term, prospective rate. Based on the most recent study the expected long-term return assumption for the Saint Francis Hospital and Medical Center Pension Plan effective October 1, 2011 will be 7.5%.

The weighted-average annual assumed rate of increase in the per capita cost of covered benefits (i.e., health care cost trend rate) is assumed to be 9.00% decreasing to 5.00% and remaining level thereafter. This health care cost trend rate assumption has a significant effect on the amounts reported. To illustrate, a one percentage point increase in the assumed health care cost trend rate would increase the service and interest cost and accumulated postretirement benefit obligation by approximately \$69,000 and \$1,376,000, respectively, at September 30, 2011. A one percentage point decrease in the assumed health care cost trend rate would decrease the service and interest cost and accumulated postretirement benefit obligation by approximately \$63,000 and \$1,265,000, respectively, at September 30, 2011.

Plan Assets

The Hospital and Medical Center's pension plan asset allocations, by asset category are as follows:

| Asset category | September 30 | |
|-------------------|--------------|------|
| | 2011 | 2010 |
| Equity securities | 50% | 54% |
| Debt securities | 45 | 43 |
| Real estate | 5 | 3 |
| Total | 100% | 100% |

The Hospital and Medical Center maintains target allocation percentages among various asset classes based on an investment policy established for the pension plan which is designed to achieve long-term objectives of return, while mitigating against downside risk and considering expected cash flows. The current weighted-average target asset allocation is as follows: equity securities 40-80%, debt securities 20-40%, and real estate 0-15%. The investment policy is reviewed from time to time to ensure consistency with the long-term objective of funding the plan to a level sufficient to pay plan benefits as they become due.

Contributions

The Hospital and Medical Center expects to contribute \$7,483,394 to its pension plan and \$1,030,866 to its other postretirement benefit plan in 2012.

11. Fair Values of Financial Instruments

For assets and liabilities at fair value, Saint Francis Care measures fair value based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are applied based on the unit of account from Saint Francis Care's perspective. The unit of account determines what is being measured by reference to the level at which the asset or liability is aggregated (or disaggregated) for purposes of applying other accounting pronouncements.

Saint Francis Care follows a valuation hierarchy that is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

- Level 1:** Quoted prices (unadjusted) in active markets that are accessible at the measurement date for identical assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs.
- Level 2:** Observable inputs that are based on inputs not quoted in active markets, but corroborated by market data.
- Level 3:** Unobservable inputs are used when little or no market data are available. The fair value hierarchy gives the lowest priority to Level 3 inputs.

11. Fair Values of Financial Instruments (continued)

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. In determining fair value, Saint Francis Care uses valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible and considers nonperformance risk in its assessment of fair value.

Financial assets and liabilities carried at fair value as of September 30, 2011 are classified in the table below in one of the three categories described above:

12. Commitments and Contingencies

The Hospital and Medical Center has guaranteed the payment of a loan made by the City of Hartford to Mount Sinai Hospital Foundation, Inc. This loan matures on August 1, 2016. The balance of this loan at September 30, 2011 and 2010 was \$922,500 and \$1,079,167, respectively.

Saint Francis Care is a party to various lawsuits incidental to its business. Management believes that the lawsuits will not have a material adverse effect on its consolidated financial position and results of operations.

Notes to Consolidated Financial Statements (continued)

12. Commitments and Contingencies (continued)

Beginning in 2007, 159 plaintiffs filed claims against the Hospital and Medical Center claiming unspecified damages resulting from the activities of a former employee that occurred over a number of years. During fiscal year 2011, 91 of the 159 claims were settled, including one claim which was initially tried. Another claim went to trial and resulted in a jury award, which management has appealed. During fiscal year 2010, one claim was settled. Based on such experience management has estimated and accrued a liability for remaining claims, net of applicable insurance coverage. The ultimate disposition of the remaining claims may be materially different from amounts accrued and management is unable to estimate a range of additional loss at this time. The expense related to settled claims and the estimated liability for outstanding claims is included in supplies and other expense and pension and other liabilities, respectively, in the accompanying consolidated financial statements.
