## Independent Auditors Report

To the Board of Trustees of  
Griffin Hospital

We have audited the accompanying consolidated financial statements of Griffin Hospital and its subsidiary (the "Hospital"), which comprise the consolidated balance sheets as of September 30, 2013 and 2012, and the related consolidated statement of operations, consolidated statement of changes in net assets and consolidated statement of cash flows for the years then ended.

### Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor's Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Hospital's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Hospital's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Griffin Hospital and its subsidiary at September 30, 2013 and 2012 and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### 1. Organization

The Griffin Hospital (the "Hospital") is a licensed 160-bed acute care hospital located in Derby, Connecticut and is part of an affiliated group which consists of its parent corporation, Griffin Health Services Corporation ("GHSC"), including Griffin Pharmacy and Gifts ("GP&G"), and certain other affiliates, primarily the Griffin Hospital Development Fund ("GHDF"), the fund-raising organization for GHSC and the other tax-exempt subsidiaries; G.H. Ventures, Inc. ("GHV"), a for profit organization currently managing medical office buildings; Planetree Inc. ("Planetree"), a not-for-profit entity assisting hospitals and other health care facilities in the development and implementation of a patient centered model of care; the Griffin Faculty Practice Plan, Inc. ("FPP"), a not-for-profit entity incorporated for the purpose of providing medical services and to charge for services performed by physicians as supervisors of interns, and Healthcare Alliance Insurance Company, Ltd. ("HAIC"), a for profit off-shore captive insurance company.

#### 2. Summary of Significant Accounting Policies

##### Principles of Consolidation

The consolidated financial statements include the accounts of the Hospital and its wholly owned subsidiary, FPP. All significant intercompany accounts and transactions are eliminated in consolidation.

##### Basis of Presentation

The consolidated financial statements have been prepared on the accrual basis of accounting.

Resources are reported for accounting purposes in separate classes of net assets based on the existence or absence of donor-imposed restrictions. In the accompanying financial statements, net assets have been reported as follows:

##### Permanently Restricted

Net assets subject to explicit donor-imposed stipulations that they be maintained by the Hospital in perpetuity are classified as permanently restricted. Generally, the donors of these assets permit the Hospital to use all or part of the investment return on these assets for operating purposes.

##### Temporarily Restricted

Net assets whose use by the Hospital is subject to explicit donor-imposed stipulations that can be fulfilled upon incurrence of expenses by the Hospital pursuant to those stipulations or that expire by the passage of time are classified as temporarily restricted.

##### Unrestricted

Net assets that are not subject to explicit donor-imposed stipulations are classified as unrestricted. Unrestricted net assets may be designated for specific purposes by action of the Board of Trustees or may otherwise be limited by contractual agreements with outside parties.

Revenues from sources other than contributions are reported in unrestricted net assets. Contributions are reported as increases in the applicable category of net assets, consistent with donor designation. Expenses are reported as decreases in unrestricted net assets. Gains and losses on investments and other assets or liabilities are reported as increases or decreases in unrestricted net assets, unless their use is restricted by explicit donor stipulations or by law. Expirations of temporary restrictions on net assets, that is, the donor-imposed stipulated purpose has been accomplished and/or stipulated time period has elapsed, are reported as reclassifications between the applicable classes of net assets.

# **The Griffin Hospital and Subsidiary**

## **Notes to Consolidated Financial Statements**

### **September 30, 2013 and 2012**

---

Grant revenues and expenses relating to Hospital operations are included within operating revenues and expenses. Grant revenues and expenses relating to research are included within nonoperating gains and losses.

Contributions, including unconditional promises to give, are recognized as increases in net assets at the date the gift or promise is received. Contributions of assets other than cash are recorded at their estimated fair value. Contributions to be received after one year are discounted at a rate commensurate with the risks involved. Amortization of the discount is recorded as additional contribution revenue in accordance with the donor-imposed stipulations, if any, on the contributions.

Contributions restricted for the acquisition of land, buildings and equipment are reported as temporarily restricted support. These contributions are reclassified to unrestricted net assets when the capital asset is acquired or placed in service.

#### **Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Hospital's and FPP's significant estimates include the allowances for patient accounts receivable contractual allowances and estimated final settlements due to or from third party payors, professional and general liability loss reserves and pension assumptions.

#### **Cash and Cash Equivalents**

Cash and cash equivalents include investments in highly liquid instruments with a maturity of three months or less when purchased, excluding amounts whose use is limited by the Board of Trustees or other restrictive arrangements.

The majority of the Hospital's banking activity, including cash and cash equivalents, is maintained with a regional bank and from time to time exceeds federal insurance limits. It is the Hospital's policy to monitor the bank's financial strength on an ongoing basis.

#### **Beneficial Interest in Trusts**

The fair value of contributions received from perpetual trust assets held by third parties is measured at the Hospital's proportionate share of the fair value of the trust's assets at the time the Hospital is notified of the trust's existence and periodically adjusted for changes in value. Distributions received by the Hospital may be restricted by the donor. These assets are classified as permanently restricted net assets.

#### **Inventories**

Inventories, which are included in other current assets, are stated at the lower of cost, using the first-in, first-out method, or market. Inventories are included in other current assets.

#### **Fair Value Measurements**

Fair value standards define fair value and establish a framework for measuring fair value. The framework provides a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under this principle are as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Hospital and FPP have the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The fair value of the Hospital's and FPP's investments is based on quoted market values.

The fair value of the Hospital's interest rate swaps liability is based on observable inputs other than quoted prices for similar instruments.

#### **Investments and Investment Income**

Investments in equity securities with readily determinable fair values and all investments in debt securities are measured at fair value at the balance sheet date. Investments of donor restricted funds are classified as long-term investments. Investment income or loss (including realized and unrealized gains and losses on investments, interest and dividends) is included in the deficiency of revenues over expenses unless the income or loss is restricted by donor or law.

#### **Assets Limited as to Use**

Assets limited as to use include assets set aside by the Board of Trustees in a depreciation fund for future capital improvements; and assets held by a trustee under an indenture agreement.

## **Notes to Consolidated Financial Statements**

### **September 30, 2013 and 2012**

---

#### **Property, Plant and Equipment**

Property, plant and equipment are recorded at cost or in the case of donated property at the fair value at the date of gift. Depreciation is provided over the estimated useful life of each class of depreciable asset and is computed using the straight-line method with one-half year of depreciation expense recorded in the year of acquisition. Uniform useful lives assigned to assets are based upon the American Hospital Association estimated useful lives of depreciable hospital assets guidelines and range from 5 to 50 years. Maintenance and repairs are charged to expense as incurred, and betterments and major renewals are capitalized. Upon sale or disposal of property, plant or equipment, the cost and accumulated depreciation are removed from the respective accounts, and any gain or loss is included in operations. Equipment under capital leases is amortized on the straight-line method over the shorter of the lease term or the estimated useful life of the equipment. Such amortization is included in depreciation and amortization expense. Interest cost incurred on borrowed funds during the construction period of capital assets is capitalized as a component of the cost of acquiring those assets.

The Hospital performed a review of certain building improvement and construction assets during the course of last year. The review determined that certain assets were being depreciated over a term that was shorter than the assets' expected life. As such the useful lives were adjusted and the corresponding depreciation was prospectively adjusted as appropriate.

Gifts of long-lived assets such as land, buildings, or equipment are reported as unrestricted support, and are excluded from the deficiency of revenues over expenses, unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as restricted support. Absent explicit donor stipulations about how long-lived assets must be maintained, expirations of donor restrictions are reported when the donated or acquired long-lived assets are placed in service.

#### **Asset Retirement Obligation**

The Hospital accrues for asset retirement obligations, primarily asbestos related removal costs, in the period in which they are incurred if sufficient information is available to reasonably estimate the obligation. Over time, the liability is accreted to its settlement value. Upon settlement of the liability, the Hospital will recognize a gain or loss for any difference between the settlement amount and the liability recorded.

#### **Interest in Net Assets of Affiliate**

Interest in net assets of affiliate represents the Hospital's interest in the net assets of GHDF.

#### **Cost of Borrowing**

Issuance costs related to the Hospital's bond issuance are being amortized using the effective interest method over the life of the debt. Amortization expense, which is included in interest expense, was \$79,839 and \$66,926 for 2013 and 2012, respectively.

The discount from face value at which debt has been issued is reflected as a reduction of the carrying value of such debt. The premium from face value at which debt has been issued is reflected as an addition to the carrying value of such debt. Discounts and premiums are amortized or accreted over the life of the debt, using the effective interest method.

#### **Professional and General Liability Loss Reserves**

The liability for claims is determined by management based on data processed by independent loss adjusters. The liability for adverse claims development and the liability for claims incurred but not reported are determined by management based on actuarial studies of related data prepared by independent actuaries.

Due to the nature of the underlying insurance risks and the general uncertainty surrounding medical malpractice claims settlement, the liability for losses is an estimate and could vary significantly from the amount ultimately paid. However, the liability for losses reflects the best estimate of ultimate loss based on historical experience and actuarial projections.

#### **Excess of Revenues Over Expenses**

The statement of operations includes an excess of revenues over expenses. Changes in unrestricted net assets which are excluded from the excess of revenues over expenses, consistent with industry practice, include changes in interests in net assets of affiliate, transfers of assets to and from affiliates for other than goods and services, and pension and other post-retirement related changes other than net periodic benefit cost.

#### **New Accounting Pronouncement**

The Corporation adopted Accounting Standard Update (“ASU”) No. 2011-7, which requires health care entities to change the presentation of their statement of operations by reclassifying the provision for bad debts associated with patient service revenue from an operating expense to a deduction from patient service revenue (net of contractual allowances and discounts). Additionally those health care entities are required to provide enhanced disclosures about their policies for recognizing revenue, assessing bad debts, and disclosures of patient service revenue (net of contractual allowances and discounts).

#### **Net Patient Service Revenue**

The Hospital and FPP have agreements with third-party payors that provide for payments at amounts different from established rates. Payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges, per diem payments, fee schedule payments and capitated fees. Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors due to future audits, reviews and investigations.

Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as adjustments become known or as years are no longer subject to such audits, reviews or investigations. Contracts, loans and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates may change by a material amount in the future. During 2013 and 2012, the Hospital recorded several adjustments for amounts recognized related to prior years, including adjustments to prior year estimates. The net effect of such adjustments was a decrease in net patient service revenue of approximately \$196,000 and a decrease of approximately \$554,000 in fiscal years 2013 and 2012, respectively.

# The Griffin Hospital and Subsidiary

## Notes to Consolidated Financial Statements

### September 30, 2013 and 2012

#### Free Care

The Hospital provides care to patients who meet certain criteria under its free care policy without charge or at amounts less than its established and contractual rates. Because the Hospital does not pursue collection of amounts determined to qualify as free care, they are not reported as net patient service revenue. Free care of approximately \$4,850,000 and \$6,785,000 measured at the Hospital's respective established rates was provided in fiscal year 2013 and 2012, respectively.

#### Income Taxes

The Hospital and FPP are not-for-profit organizations, exempt from federal income taxes under Section 501(c) (3) of the Internal Revenue Code.

#### Subsequent Events

Management has evaluated subsequent events for the period after September 30, 2013 through January 30, 2014, the date the financial statements were issued.

#### Reclassifications

Certain amounts in the 2012 consolidated financial statements have been reclassified to conform to the 2013 financial statement presentation.

### 3. Net Patient Service Revenue

Net patient service revenue for the years ended September 30, 2013 and 2012 is comprised as follows:

	2013			2012		
	Hospital	FPP	Total	Hospital	FPP	Total
Patient service charges	\$ 438,847,354	\$ 6,190,769	445,038,123	\$ 411,206,017	\$ 5,471,322	\$ 416,677,339

Net patient service revenue (less contractuals)	128,179,238	3,349,573	131,528,811	121,061,315	2,919,092	123,980,407
Provision for doubtful accounts, net of recoveries	(2,373,418)	(114,342)	(2,487,760)	(985,612)	(116,377)	(1,101,989)
Net patient service revenue	\$ 125,805,820	\$ 3,235,231	\$ 129,041,051	\$ 120,075,703	\$ 2,802,715	\$ 122,878,418

The Hospital and FPP have agreements with the Federal Medicare Program ("Medicare"), the State of Connecticut ("State") Medicaid Program ("Medicaid"), and certain indemnity and managed care programs that determine payments for services rendered to patients covered by these programs.

A summary of the payment arrangements with major third-party payors is as follows:

#### Medicare

The Hospital is reimbursed for services rendered to nonpsychiatric inpatients under the prospective payment system ("PPS"), under which payments are based on standard national and regional amounts depending on patient diagnosis (Diagnosis Related Group or "DRG") and without regard to the Hospital's actual costs. PPS permits additional payments, within specified limitations, to be made for atypical cases (outliers) and graduate medical education. Inpatient psychiatric services are also paid under a prospective per diem payment system established by Medicare.

The Hospital is reimbursed for most outpatient services under a prospective payment methodology based on ambulatory payment classifications ("APC") which are paid on standard national and regional amounts for procedures rendered to the patients and without regard to the Hospital's actual costs. The remaining outpatient services (e.g., routine clinical lab, physical therapy) are reimbursed on a fee schedule.

**Notes to Consolidated Financial Statements**  
**September 30, 2013 and 2012**

---

The Hospital is reimbursed for cost reimbursable items at a tentative rate with final settlement after submission of annual cost reports and audits thereof by the Medicare fiscal intermediary. The estimated amounts due to or from the program are reviewed and adjusted annually based on the status of such audits and any subsequent appeals. Differences between final settlements and amounts accrued in previous years are reported as adjustments to net patient service revenue in the year the examination is substantially complete. The Hospital's Medicare cost reports have been audited by the Medicare fiscal intermediary through September 30, 2009.

**Medicaid**

Inpatient services rendered to Medicaid program beneficiaries, except for those beneficiaries in the State's Aid to Families with Dependent Children ("AFDC") population, are reimbursed under a cost reimbursement methodology. The Hospital is reimbursed a tentative rate with final settlement determined after submission of annual cost reports by the Hospital and audits thereof by the State. Outpatient services are reimbursed at predetermined fee schedules or percent of charges. In addition, the State also contracts with various managed care organizations to provide services to the State's AFDC population. The Hospital contracts with one or more of these managed care organizations and provide services on a per diem rate for inpatient and fee schedules or percent of charges for outpatients.

**Other Payers**

The Hospital has also entered into payment agreements with certain commercial insurance carriers, health maintenance organizations, and preferred provider organizations. The basis for payment to the Hospital under these agreements includes prospectively determined rates per discharge, discounts from established charges, prospectively determined per diem rates, fee schedule payments and capitated fees.

**Future Reimbursement**

Current trends in the health care industry include mergers and other forms of affiliations among providers, increasing shifts to managed care, an overall reduction in inpatient average length of stay, increasingly restrictive reimbursement policies by governmental and private payors, and the prospect of significant changes in legislation at the State and national level. The Hospital cannot assess or project the ultimate effect of these or other items that may have an impact on the future operations of the Hospital.

### September 30, 2013 and 2012

---

Included in property, plant and equipment as of September 30, 2013 and 2012 are capital lease assets for major movable equipment with a cost of \$8,901,170. Accumulated amortization on the respective capital lease assets was \$5,727,151 and \$4,488,949 as of September 30, 2013 and 2012, respectively.

Amortization expense on capital lease assets was \$1,238,202 and \$1,301,187 for 2013 and 2012, respectively.

#### 6. Insurance Liability Loss Reserves

HAIC insures the professional and general liabilities of the Hospital under a claims-made policy with a retroactive date of October 1, 1986. There are known claims and incidents that may result in the assertion of additional claims as well as claims from unknown incidents that may be asserted arising from services provided to patients. The Hospital has utilized independent actuaries to estimate the ultimate costs, if any, of the settlement of such claims. Accrued malpractice reserves for professional and general liability have been discounted at 3.5% at September 30, 2013 and 3.5% at September 30, 2012. In management's opinion these reserves provide an adequate reserve for loss. The Hospital has purchased excess insurance coverage to cover claims in excess of \$1,500,000 and \$4,500,000 in the aggregate. An independent actuary has been utilized to estimate the ultimate cost of claims incurred contingencies.

Effective January 1, 2003 Griffin Hospital began retaining the first \$250,000 of all loss and allocated loss adjustment expense per accident for its workers compensation exposure. Excess coverage above \$250,000 per accident was purchased. Beginning January 1, 2007 the per occurrence retention was increased to \$300,000. Annual aggregate coverage was also purchased which provides \$1 million of coverage above a maximum limit of retained losses within the per occurrence retention. Beginning October 1, 2010 the per occurrence retention was increased to \$400,000 and the annual aggregate coverage was discontinued. The workers' compensation reserves have been discounted at 2.5% and 2.5% at September 30, 2013 and 2012, respectively, and in management's opinion provide an adequate reserve for loss contingencies.

The Hospital also has recorded self-insurance reserves for its employee health plan, for the deductible portion of workers' compensation indemnity losses from January 1, 1999 and prior, and for the medical cost component of its workers' compensation losses prior to January 1, 2003, subject to certain umbrella and stop-loss coverage limits. The Hospital accrues its best estimate of its retained liability for occurrences through each balance sheet date.

Effective March 28, 2013 the Hospital entered into a novation agreement with American Insurance Group Inc., where it legally transfed all exposure relating to primary layer professional liability and physicians professional liability policies issued to the Hospital in the years 2006/07, 2007/08, 2009/10, 2010/11 and 2011/12, by making a onetime premium payment of \$7,400,000. The loss portfolio transfer effectively transfers the liabilities and subsequent adverse claim development risk to a third party insurer. As a result of the transaction, cash of \$3,900,000 became unrestricted and was transferred from HAIC to the Hospital. In addition, a loss of \$818,214 was realized on the transaction. The loss was the result of the premium payment exceeding the amount of loss reserves previously recorded at HAIC. The loss is included in the fiscal year 2013 operating expenses of the Hospital.

**7. Long-Term Debt**

Long-term consists of the following at September 30, 2013 and 2012:

	<b>2013</b>	<b>2012</b>
State of Connecticut Health and Educational Facilities Authority		
Series B	\$ 15,990,000	\$ 17,200,000
Series C	21,575,000	22,100,000
Series D	10,350,000	10,550,000

	<u>\$ 43,898,212</u>	<u>\$ 46,957,600</u>

The State of Connecticut Health and Educational Facilities Authority (“CHEFA”) Revenue Bonds, The Griffin Hospital Issue, Series B, totaling \$24,800,000 were issued in February 2005. The Series B bonds bear interest at rates ranging from 2.4% to 5.0%. Interest is due semi-annually on January 1 and July 1. A bond premium of \$969,815 and bond issuance costs of \$1,196,512 are amortized over the life of the bond using the effective interest rate method. The Series B bonds are insured by Radian Asset Guaranty Corporation. The bonds are payable annually each July 1 through 2015 and on July 1, 2020 and July 1, 2023 in the amounts of \$7,750,000 and \$5,640,000, respectively. The Series B bonds maturing after July 1, 2015 are subject to redemption prior to maturity commencing July 1, 2015. The estimated fair value of the Series B bond was approximately \$21,575,000 and \$17,820,000 at September 30, 2013 and 2012, respectively.

In May 2007, CHEFA issued \$23,125,000 revenue bonds, The Griffin Hospital Issue, Series C and \$10,925,000 variable rate revenue bonds, The Griffin Hospital Issue, Series D.

In May 2008, the Hospital refunded The Griffin Hospital Issue 2007 Series C and The Griffin Hospital Issue 2007 Series D bonds, which were initially issued as auction rate bonds, and issued \$23,125,000 Griffin Hospital Issue 2008 Series C Variable Rate Demand bonds and \$10,925,000 Griffin Hospital Issue 2008 Series D Variable Rate Demand Bonds (together referred to as “Series 2008 Bonds”). The Series 2008 Bonds are insured by Radian Asset Guaranty Corporation.

In order to provide liquidity for the Series 2008 Bonds, the Hospital has a standby letter of credit with Wells Fargo Bank N.A. for \$34,050,000 which expires in May 2015. As of September 30, 2012 the Hospital was in violation of the letter of credit’s required debt service coverage ratio and capitalization ratio. In April 2013, Wells Fargo amended the letter of credit agreement to allow, as of September 30, 2012, the calculation of these ratios to exclude certain nonrecurring expenditures for consulting expenses. The consulting expenditures were incurred to help the Hospital identify and implement cost reductions and put in place software and controls designed to monitor and continue the cost containment process. Should the Series 2008 Bonds be put back, and the standby letter of credit be called, the Hospital would be required to repay the principal ratably over a 5-year period, beginning 180 days following the put.

## Notes to Consolidated Financial Statements

### September 30, 2013 and 2012

---

Under the terms of the CHEFA bonds, the Obligated Group (the Hospital, GHSC and GHDF) are required to maintain 50 days operating cash on hand and a debt service coverage ratio of 1.2 to 1. Additionally, the Obligated Group is required to maintain a capitalization ratio of less than .65. As of September 30, 2012 the Obligated Group failed to meet the debt service coverage and capitalization ratios. As a result of the covenant violations, the Obligated Group entered into a Forbearance Agreement in April 2013 with Radian Asset Assurance, Inc., the bond insurer. The Forbearance Agreement waived the covenant violations as of September 30, 2012 and modified the debt to equity ratio calculation going forward to allow exclusion of any realized or unrealized gain or loss on the interest rate swap. In addition, the forbearance agreement added an additional loan covenant that beginning March 31, 2013 requires the Obligated Group to maintain an average payment period days of less than 110 days.

The obligated group was in compliance with all debt covenants in fiscal year 2013.

The CHEFA bonds are collateralized by the gross receipts of the Obligated Group and certain real property of the Hospital.

Aggregate scheduled principal payments on all long-term debt are as follows:

2014	\$ 2,040,000
2015	2,135,000
2016	2,225,000
2017	2,345,000
2018	2,475,000
Thereafter	<u>36,695,000</u>
	<u>\$ 47,915,000</u>

To the extent the Hospital is unable to remarket the Series 2008 bonds, the Hospital would be obligated to repurchase these bonds from the proceeds of the Hospital's standby letter of credit. The previous debt maturities table reflects the payment of principal on these bonds according to their scheduled maturity dates. If the Series 2008 bonds were fully tendered by the bondholders to the Hospital as of September 30, 2013, the table of annual principal payments would become:

2013	\$ 4,457,500
2014	7,720,000
2015	7,785,000
2016	7,855,000
2017	7,935,000
Thereafter	<u>12,162,500</u>
	<u>\$ 47,915,000</u>

**The Griffin Hospital and Subsidiary**  
**Notes to Consolidated Financial Statements**  
**September 30, 2013 and 2012**

---

Under the terms of the bond agreements, the Hospital is required to maintain certain funds with a trustee for specified purposes and time periods. Required payments to the trustee are made by the Hospital in amounts sufficient to provide for the payment of principal, interest and sinking fund installments as they become due, and certain other payments. Assets held by the trustees pursuant to the indentures as of September 30, 2013 and 2012 are as follows:

	<b>2013</b>	<b>2012</b>
Debt service reserve fund	\$ 4,288,126	\$ 4,287,910
Debt service fund	199,829	215,120
Principal fund	511,955	485,164
Accrued interest receivable	1,107	831
	<u>\$ 5,001,017</u>	<u>\$ 4,989,025</u>

In fiscal year 2012 the Hospital borrowed \$1,062,048 of the net cash value of certain officer universal life insurance policies for working capital purposes. The fiscal year 2012 borrowing was repaid in fiscal year 2013. There were no borrowings in fiscal year 2013.

**Derivative Instruments**

The Hospital initially issued its Series 2007 Series C and 2007 Series D bonds bearing interest at a variable rate. In May 2007, the Hospital entered into two interest rate swap agreements to manage interest rate risk. These agreements involve payment of fixed rate interest payments by the Hospital in exchange for the receipt of variable rate interest payments from the counterparties, based on a percentage of the London Interbank Offered Rate (LIBOR). In 2008, the Hospital refinanced the Series 2007 bonds and issued the Series 2008 Bonds. These bonds also bear interest at a variable rate. The two original swap agreements continue to be utilized by the Hospital to manage its interest rate risk. At September 30, 2013, the notional amount of the derivative financial instruments was \$21,575,000 (Series 2008 Issue C nontaxable bonds) and \$10,350,000 (Series 2008 Issue D taxable bonds), respectively.

Upon the occurrence of certain events of default or termination events identified in the derivative contracts, either the Hospital or the counterparty could terminate the contract in accordance with its terms. Termination would result in the payment of a termination amount by one party to compensate the other party for its economic losses. The cost of termination would depend, in major part, on the then current interest rate levels, and if the interest rate levels were then lower than those specified in the derivative contract, the cost of termination to the Hospital could be significant.

The fair value of these derivatives was a liability of \$6,022,007 and \$9,153,353 as of September 30, 2013 and 2012, respectively, which is included in long-term liabilities. The impact of the change in fair value was income of \$3,131,346 and expense of \$1,179,451 for the years ended September 30, 2013 and 2012, respectively. This change is included in the net realized and unrealized losses on interest rate swap agreements, which also includes the net periodic settlement payments related to the swap agreements of \$1,327,993 and \$1,344,099 for 2013 and 2012, respectively.

## **12. Pension and Other Postretirement Benefits**

#### **Pension Benefits**

The Hospital sponsors a noncontributory defined benefit pension plan that covers substantially all of its employees and provides for retirement and death benefits. The Hospital's policy is to fund actuarially determined pension costs as accrued.

Effective May 1, 2010, credited service accruals under the retirement plans for employees of the Griffin Hospital were frozen for the April 1, 2010 to March 31, 2012 period. Participants continued to earn vesting service during the freeze period and pay increases during the freeze period was reflected in participant's final earnings calculation however no credited service was earned for the period from April 1, 2010 to March 31, 2012. Effective April 1, 2012 the plan freeze was terminated and credit service accruals were reestablished at a reduced rate.

The Hospital's accumulated benefit obligation was \$93,064,814 and \$100,786,846 at September 30, 2013 and 2012, respectively.

**The Griffin Hospital and Subsidiary**  
**Notes to Consolidated Financial Statements**  
**September 30, 2013 and 2012**

**Other Postretirement Benefits**

The Hospital also provides certain health care and life insurance benefits for eligible retired employees and their dependents. Substantially all of the Hospital's full-time employees may become eligible for these benefits upon retirement if certain age and service criteria are met. Effective January 1, 2004, employees will need to be at least age 62 at retirement to be eligible for coverage. Employees who are eligible for these benefits at the time of their retirement and who meet the requirements to receive an immediate pension plan benefit are provided continued health and life insurance coverage throughout their retirement. The plan is unfunded.

Pertinent information relating to these plans is as follows, based on a September 30 measurement date:

**Asset Investment Strategy**

The Hospital has adopted a liability driven investment (“LDI”) strategy. Primary focus is to minimize the volatility of the funding ratio by aligning the Plan’s assets with its liabilities in terms of how both respond to interest rate changes; this is then followed by an investment objective strategy to achieve a satisfactory rate of return based on the asset allocation profile in the long term and satisfy the plan’s benefit obligations, while incurring an acceptable pension cost to the sponsor in the long run. The objective will result in a prescribed asset mix between return seeking assets and a LDI bond portfolio.

**13. Concentrations of Credit Risk**

The Hospital grants credit without collateral to its patients, most of who are local residents and are insured under third-party payor agreements. The mix in patient accounts receivable as of September 30, 2013 and 2012 before allowances for doubtful accounts, consisted of the following:

	<b>2013</b>	<b>2012</b>
Medicare and Medicaid	18 %	13 %
Commercial insurance	19	21
Managed care	27	27
Self-pay patients	33	37

**14. Functional Expenses**

The Hospital provides general health care services to residents within its geographic location. Expenses relating to providing these services at September 30, 2013 and 2012 are as follows:

	<b>2013</b>	<b>2012</b>
Patient care and clinical	\$ 115,173,502	\$ 112,399,993
General and administrative	<u>21,542,477</u>	<u>22,465,237</u>
	<u>\$ 136,715,979</u>	<u>\$ 134,865,230</u>

**15. Endowments**

The Hospital's endowment funds consist of donor restricted funds to be invested in perpetuity to provide a permanent source of income. The net assets associated with endowment funds are classified and reported based on the existence or absence of donor imposed restrictions.

The Hospital has interpreted the Connecticut UPMIFA statute as requiring the preservation of the original gift as of the gift date of the donor-restricted endowment funds absent explicit donor stipulations to the contrary. As a result of this interpretation, the Hospital classifies as permanently restricted net assets, (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted net assets until those amounts are appropriated for expenditure by the Hospital in a manner consistent with the standard of prudence prescribed by UPMIFA. In accordance with UPMIFA, the Hospital considers the following factors in making a determination to appropriate or accumulate endowment funds:

- (1) The duration and preservation of the fund.
- (2) The purposes of the Hospital and the donor restricted endowment fund.
- (3) General economic conditions.
- (4) The possible effect of inflation and deflation.
- (5) The expected total return from income and the appreciation of investments.
- (6) Other resources of the Hospital.
- (7) The investment policies of the Hospital.

Endowment net assets at end of year	<u>\$ 1,089,279</u>	<u>\$ 2,160,261</u>	<u>\$ 3,249,540</u>

The primary long-term management objective for the Hospital's endowment funds is to maintain the permanent nature of each endowment fund, while providing a predictable, stable, and constant stream of earnings. Consistent with that objective, the primary investment goal is to earn annual interest and dividends.

**16. Commitments and Contingencies**

The Hospital is involved in various legal matters arising in the normal course of activities. Although the ultimate outcome is not determinable at this time, management, after taking into consideration advice of legal counsel, believes that the resolution of these pending matters will not have a material adverse effect, individually or in the aggregate, upon the consolidated financial statements.

## **Consolidating Information**

## **Report of Independent Auditors on Accompanying Consolidating Information**

To the Board of Trustees of  
The Griffin Hospital:

The report on our audits of the consolidated financial statements of The Griffin Hospital and Subsidiary as of September 30, 2013 and 2012 and for the years then ended appears on page 1 of this document. Those audits were conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The consolidating information is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position and results of operations of the individual companies. Accordingly, we do not express an opinion on the financial position and results of operations of the individual companies. However, the consolidating information has been subjected to the auditing procedures applied in the audits of the consolidated financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the consolidated financial statements taken as a whole.
