Improvements

The building has been vacant since 2001. The property is improved with a one and five story brick building containing a gross floor area of 27, 845 sq. ft., plus a 4,000 sq. ft. unfinished basement. The building was built as a hotel in 1926, and a garage addition was added in 1930.

The ground floor contains three large rooms which were last used as a lounge, meeting room, and dining area, two small offices, elevator, stairwell, and main lobby. The kitchen and dining has are in the 2,600 sq. ft. one story section of the building.

The first floor (so-called) contains eight meeting rooms, each with 2-fixture lavatories. The second, third, and fourth floors each contain 17 rooms with a 2-fixture lavatory and a shower stall in each room. The basement contains a boiler room, mechanical room, storage rooms and refrigerated rooms. The floors are connected by one internal stairway and a pedestrian elevator with a 2,000 lb capacity. A metal exterior fire escape is located at the southeast corner of the building.

The interior is finished with carpet floors in the rooms and halls, vinyl flooring in the lavatories, sheetrock and plaster walls and ceilings.

The building was heated by two oil fired steam boilers with cast iron radiators in each room. Additional heat was provided by electric baseboard units in the first and second floors. Suspended gas fired space heaters are in the kitchen area.
