

Point-in-Time Count Summaries for Homeless Sheltered and Unsheltered 2012; for Sheltered and Unsheltered 2011; and Yearly Comparisons

Data in these tables are derived from information collected in recent Connecticut Homelessness Point in Time Counts (*CT PIT*). These data account for sheltered and unsheltered homeless persons in Connecticut on a single night in January. Section A represents the results of the *CT PIT 2012* count, conducted on January 25, 2012. Per HUD guidelines, the unsheltered component of the count is conducted every other year. The unsheltered count is from the previous PIT count, in 2011. Section B represents the results of the *CT PIT 2011* Sheltered Count, conducted January 27, 2011.

- Part 1 of Section A, B, and C contains actual counts of every client in an emergency shelter or in transitional housing. It also includes the total projected count of Connecticut's unsheltered population on the date of the *CT PIT 2011* count. There is no unsheltered data for the *CT PIT 2012* count.
- Part 2 of Section A, B, and C represents segments of the entire homeless population, as informed by client responses to the PIT Count questionnaire. Answers to specific questions on the PIT Count survey tool are generalized from those who responded to those who did not, resulting in an extrapolated count of sheltered and unsheltered homeless persons in each appropriate category.

* Per HUD definition, someone with a disabling condition who has been continuously homeless for a year or more, or at least four times in the past two years, is chronically homeless. A Family is chronically homeless if at least one adult meets the HUD definition. Unlike the other percentages on this page, those for chronic exclude clients in transitional housing, since by HUD definition they cannot be counted as chronically homeless.

Point-in-Time Count Summaries for Homeless Sheltered and Unsheltered 2012; for Sheltered and Unsheltered 2011; and Yearly Comparisons

Data in these tables are derived from information collected in recent Connecticut Homelessness Point in Time Counts (CT PIT). These data account for sheltered and unsheltered homeless persons in Connecticut on a single night in January. Section A represents the results of the CT PIT 2012 count, conducted on January 25, 2012. Per HUD guidelines, the unsheltered component of the count is conducted every other year. The unsheltered count is from the previous PIT count, in 2011. Section B represents the results of the CT PIT 2011 Sheltered Count, conducted January 27, 2011.

- Part 1 of Section A, B, and C contains actual counts of every client in an emergency shelter or in transitional housing. It also includes the total projected count of Connecticut's unsheltered population on the date of the CT PIT 2011 count. There is no unsheltered data for the CT PIT 2012 count.
- Part 2 of Section A, B, and C represents segments of the entire homeless population, as informed by client responses to the PIT Count questionnaire. Answers to specific questions on the PIT Count survey tool are generalized from those who responded to those who did not, resulting in an extrapolated count of sheltered and unsheltered homeless persons in each appropriate category.

* Per HUD definition, someone with a disabling condition who has been continuously homeless for a year or more, or at least four times in the past two years, is chronically homeless. A Family is chronically homeless if at least one adult meets the HUD definition. Unlike the other percentages on this page, those for chronic exclude clients in transitional housing, since by HUD definition they cannot be counted as chronically homeless.

Point-in-Time Count Summaries for Homeless Sheltered and Unsheltered 2012; for Sheltered and Unsheltered 2011; and Yearly Comparisons

Data in these tables are derived from information collected in recent Connecticut Homelessness Point in Time Counts (CT PIT). These data account for sheltered and unsheltered homeless persons in Connecticut on a single night in January. Section A represents the results of the CT PIT 2012 count, conducted on January 25, 2012. Per HUD guidelines, the unsheltered component of the count is conducted every other year. The unsheltered count is from the previous PIT count, in 2011. Section B represents the results of the CT PIT 2011 Sheltered Count, conducted January 27, 2011.

- Part 1 of Section A, B, and C contains actual counts of every client in an emergency shelter or in transitional housing. It also includes the total projected count of Connecticut's unsheltered population on the date of the CT PIT 2011 count. There is no unsheltered data for the CT PIT 2012 count.

- Part 2 of Section A, B, and C represents segments of the entire homeless population, as informed by client responses to the PIT Count questionnaire. Answers to specific questions on the PIT Count survey tool are generalized from those who responded to those who did not, resulting in an extrapolated count of sheltered and unsheltered homeless persons in each appropriate category.

* Per HUD definition, someone with a disabling condition who has been continuously homeless for a year or more, or at least four times in the past two year, is chronically homeless. A Family is chronically homeless if at least one adult meets the HUD definition. Unlike the other percentages on this page, those for chronic exclude clients in transitional housing, since by HUD definition they cannot be counted as chronically homeless.

Point-in-Time Count Summaries for Homeless Sheltered and Unsheltered 2012; for Sheltered and Unsheltered 2011; and Yearly Comparisons

Data in these tables are derived from information collected in recent Connecticut Homelessness Point in Time Counts (CT PIT). These data account for sheltered and unsheltered homeless persons in Connecticut on a single night in January. Section A represents the results of the CT PIT 2012 count, conducted on January 25, 2012. Per HUD guidelines, the unsheltered component of the count is conducted every other year. The unsheltered count is from the previous PIT count, in 2011. Section B represents the results of the CT PIT 2011 Sheltered Count, conducted January 27, 2011.

- Part 1 of Section A, B, and C contains actual counts of every client in an emergency shelter or in transitional housing. It also includes the total projected count of Connecticut's unsheltered population on the date of the CT PIT 2011 count. There is no unsheltered data for the CT PIT 2012 count.

- Part 2 of Section A, B, and C represents segments of the entire homeless population, as informed by client responses to the PIT Count questionnaire. Answers to specific questions on the PIT Count survey tool are generalized from those who responded to those who did not, resulting in an extrapolated count of sheltered and unsheltered homeless persons in each appropriate category.

* Per HUD definition, someone with a disabling condition who has been continuously homeless for a year or more, or at least four times in the past two years, is chronically homeless. A Family is chronically homeless if at least one adult meets the HUD definition. Unlike the other percentages on this page, those for chronic exclude clients in transitional housing, since by HUD definition they cannot be counted as chronically homeless.

Connecticut Point-in-Time Count Summaries for Sheltered and Unsheltered 2012; for Sheltered and Unsheltered 2011; and Yearly Comparisons for Subcontinua within the Balance of State Continuum of Care

Data in these tables are derived from information collected in recent Connecticut Homelessness Point in Time Counts (*CT PIT*). These data account for sheltered and unsheltered homeless persons in Connecticut on a single night in January. Section A represents the results of the *CT PIT 2012* count, conducted on January 25, 2012. Per HUD guidelines, the unsheltered component of the count is conducted every other year. The unsheltered count is from the previous PIT count, in 2011. Section B represents the results of the *CT PIT 2011* Sheltered Count, conducted January 27, 2011.

- Part 1 of Section A, B, and C contains actual counts of every client in an emergency shelter or in transitional housing. It also includes the total projected count of Connecticut's unsheltered population on the date of the *CT PIT 2011* count. There is no unsheltered data for the *CT PIT 2012* count.
- Part 2 of Section A, B, and C represents segments of the entire homeless population, as informed by client responses to the PIT Count questionnaire. Answers to specific questions on the PIT Count survey tool are generalized from those who responded to those who did not, resulting in an extrapolated count of sheltered and unsheltered homeless persons in each appropriate category.

* Per HUD definition, someone with a disabling condition who has been continuously homeless for a year or more, or at least four times in the past two years, is chronically homeless. Unlike the other percentages on this page, those for chronic exclude clients in transitional housing, since by HUD definition they cannot be counted as chronically homeless.

Section C

Comparison of Connecticut Point in Time Count 2012 to 2011 Count

New Britain Subcontinuum

Per HUD Guidelines, the unsheltered count is taken every other year, so no comparison is possible between the unsheltered count in 2012 and in 2011.

Part 1: Comparisons of the Homeless Population

Emergency Shelters		Transitional Housing		All Sheltered		Unsheltered		Total Homeless	
n	% Change	n	% Change	n	% Change	n	% Change	n	% Change

Sheltered n = 2012 minus 2011. The % is the numerical difference divided by the earlier year's number (Section B).

Households with at least 1 Adult & 1 Child

* Per HUD definition, someone with a disabling condition who has been continuously homeless for a year or more, or at least four times in the past two years, is chronically homeless. A Family is chronically homeless if at least one adult meets the HUD definition. Unlike the other percentages on this page, those for chronic exclude clients in transitional housing, since by HUD definition they cannot be counted as chronically homeless.

Connecticut Point-in-Time Count Summaries for Sheltered and Unsheltered 2012; for Sheltered and Unsheltered 2011; and Yearly Comparisons for Subcontinua within the Balance of State Continuum of Care

Data in these tables are derived from information collected in recent Connecticut Homelessness Point in Time Counts (CT PIT). These data account for sheltered and unsheltered homeless persons in Connecticut on a single night in January. Section A represents the results of the CT PIT 2012 count, conducted on January 25, 2012. Per HUD guidelines, the unsheltered component of the count is conducted every other year. The unsheltered count is from the previous PIT count, in 2011. Section B represents the results of the CT PIT 2011 Sheltered Count, conducted January 27, 2011.

- Part 1 of Section A, B, and C contains actual counts of every client in an emergency shelter or in transitional housing. It also includes the total projected count of Connecticut's unsheltered population on the date of the CT PIT 2011 count. There is no unsheltered data for the CT PIT 2012 count.
- Part 2 of Section A, B, and C represents segments of the entire homeless population, as informed by client responses to the PIT Count questionnaire. Answers to specific questions on the PIT Count survey tool are generalized from those who responded to those who did not, resulting in an extrapolated count of sheltered and unsheltered homeless persons in each appropriate category.
