STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State of Connecticut

Methods and Standards for Establishing Payment Rates - Inpatient Hospital Care (continued)

(with addition of ten percent incentive, if applicable) increased by 6.5%; or (2) 80% of the cost per discharge per the 2005 cost report filings, but not to exceed \$10,750 per discharge or 142.5% of the 2007 Medicaid Cost Per Discharge (with addition of ten percent incentive, if applicable). Hospitals qualifying for an allowable cost per discharge increase under (1) or (2), shall not receive the ten percent incentive identified in Section 4005 of Public Law 101-508.

Effective April 1, 2009, general acute care hospital inpatient rates shall be adjusted for admissions that meet the criteria established in section 1(k) of the Addendum to Attachments 3.1-A and 3.1-B, Page 1(b). The methodology is as follows:

1. Hospitals are required to run all Medicaid claims through a Medicare diagnosis-related grouper to determine the Medicare payment amount with and without the present on admission indicator.
2. Hospitals are required to report to the Department all Medicaid claims with a present on admission indicator where Medicare payment was reduced. The report shall include the payment amount with the indicator and the payment amount without the indicator.
3. The Department will calculate the Medicare payment reduction percentage and apply this same percentage reduction to the Medicaid allowed amount per discharge during the annual cost settlement.

Effective November 1, 2014, inpatient hospital target amounts per discharge excluding DSH add-on for hospitals qualifying under page 3, section 4, shall be:
