UCONN User to User Group

Reporting on the Current Geospatial Projects in CT and New England

- Bringing geospatial news about the latest events, such as spring flooding, Hurricane Irene and the October Snowstorm
- When the State Geolab is activated, who participates and the event mapping projects
- Reports on what CT Municipalities are doing with GIS
- Up to date news on geospatial mapping projects from outer space to tsunamis, volcanic activities to continental shelf mining, mapping battlefields and many other topics
- Lots of geospatial tidbits and mind teasers

How We Will Continue

- We will continue with your support
- We will request submissions from all disciplines of CT, don't be surprised when we call on YOU!
- Sign up to the User to Use Network www.ct.gov/gis
- See you on GIS Day in November

The Geo-Focus Newsletter has successfully published 15 quarterly newsletters since 2008 and has many submissions from around New England
