SustiNet Board:

Please see the attached list of interested individuals and organizations requesting participation on one of the four sub committees defined in the statute. Your input has been greatly appreciated as we work toward creating work groups that will undoubtedly drive the progress of our efforts.

There has been an overwhelming interest from a wide diversity of stakeholders within the healthcare delivery system. The field of candidates is truly impressive and represents the experience and knowledge that we will need to draw upon to initiate effective reform. This outpouring of support is extremely encouraging but, unfortunately, makes our task of constructing the most effective committees all that more challenging.

As you look at the list of individuals, note that two candidates have been highlighted in yellow in each of the four committees. We propose that these candidates act as co-chairmen of the respective committee and work to drive the process of composing the work group.

It is important to recognize that this list of individuals is in draft form. We welcome any and all suggestions that board members might have in submitting qualified candidates.

This initial interest in the committee process underscores the commitment Connecticut's healthcare community has to this undertaking. We look forward to a productive meeting tomorrow.

Nancy & Kevin
