Register : <https://emenuapps.ita.doc.gov/ePublic/event/editWebReg.do?SmartCode=4Q6X>

Over the last five years Electric Boat has purchased \$296 million worth of supplies and equipment from 480 Connecticut suppliers.

US Congressman Joe Courtney, U.S. Department of Commerce, DECD, UCONN and CCAT are hosting General Dynamics Electric Boat Potential Supplier Summit on June 16, 2014, at the UCONN Avery Point Campus.

At this event, Connecticut suppliers will learn more about opportunities to work within the Electric Boat supply chain. Electric Boat is a wholly owned subsidiary of General Dynamics, headquartered in Groton, CT, that has been the primary builder of United States submarines for the last 114 years. Electric Boat's vision is to be the preferred provider for concept development, engineering and design, construction, modernization, and sustainment for all U.S. Navy submarine programs, nuclear propulsion plants, and undersea platform systems integration.

Small and mid-sized manufacturers will have an opportunity to learn about EB's current needs, understand how to get into EB's supply chain, and meet with EB supply chain executives and procurement managers.
