

CT RECOVERY Appliance Rebate Program

Mail-in Rebate available for the following
ENERGY STAR[®] AHRI¹ Qualified Central Air Systems*:

Heating and cooling costs the average homeowner about \$1,000 a year –

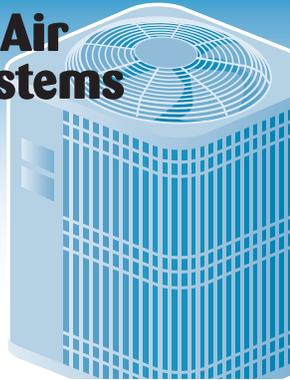

nearly half the home's total energy bill. If your central air conditioning system is more than 12 years old, replacing it with an ENERGY STAR qualified model could cut your cooling costs by 30 percent.

Earning the ENERGY STAR means products meet strict energy efficiency guidelines set by the US Environmental Protection Agency and the US Department of Energy. ENERGY STAR qualified central air conditioners have a higher seasonal energy efficiency rating (SEER) than standard models, which makes them about 14 percent more efficient than standard models.

****Rebate can not exceed 50 percent of the total cost of the central air system. Funding for this rebate program is limited to the period indicated or while funds last.***
