

Physical Techniques Tactical Medical Training

Location: Derby, CT

**Three Dates: August 25, 2015
August 26, 2015
August 27, 2015**

Program Focus:

The Physical Techniques Tactical Medical Training is a 1-day, highly intense training program requiring a physical demand on the student and consists of lecture, labs and skill practice. The Law Enforcement Officer will gain knowledge and skills necessary to mitigate the loss of their life or the life of another while in an active threat environment. The skills will address treating life threatening injuries in an austere environment with limited equipment, lack of medically trained personnel and prolonged time to evacuation. Tactical Medical is a systematic approach to dealing with casualties in a tactical environment. It is strongly influenced by the model used by the Department of Defense called Tactical Combat Casualty Care (TCCC). As the name implies, TCCC incorporates tactical problem solving into any situation in which casualties are incurred from an armed, hostile opponent.

The TCCC system focuses on saving “preventable deaths” while achieving 3 primary goals:

- Treat the Casualty
- Prevent Additional Casualties
- Continue the Mission

Who Should Attend: Qualified attendees must be sworn state, local or tribal law enforcement officers. Students should wear clothing and footwear suitable for drags, carries, bending, crawling and exposure to fake blood. **NO LIVE WEAPONS ALLOWED IN CLASS.**

Cost: TUITION-FREE (Attendees are responsible for meals, lodging and travel expenses.)

Applicant Information

Go to <https://sass.fletc.dhs.gov/fast/> and select the program name, date and/or location for the training you are interested in from the list, and complete all of the requested information. Note that the application process does not guarantee a seat in the class. If the location and/or program that you are looking for is not visible, it means that particular program is filled and is closed to applicants.
