American Recovery and Reinvestment Act 2009

Project Description:

Norwalk Transit District Pulse Point Safety and Security Improvements
\$1.5 million

Why it matters

The Norwalk Transit District's current pulse point location at Burnell Boulevard has inadequate safety, security, shelter, lighting, rider information and customer amenities.

This use of funds will supplement existing federal, state and local funds to complete the funding plan. The scope of the project is to build a canopy over the 300' length of the pulse point, add security cameras, reconstruct the sidewalk and street, add shelters, seating, explosion proof garbage receptacles and other passenger amenities.

Solid Investment

- The project will enhance transit security and encourage increased use of the transit system in Norwalk to access jobs, medical and educational opportunities, etc. that have a direct impact on economic development in the state.
- American Recovery and Reinvestment Act of 2009 funds allow the Project to proceed in a timely fashion.

Notable Project Facts

The project is at 100% design. Construction documents are complete and ready for the invitation to bid (IFB) process. Construction could begin within 60 days of award of funds.
