

(DPUC) Electric Vehicles Infrastructure Council

Attached is the Agenda for the next EV Council meeting scheduled for Friday, March 19th at 9am at the offices of the Department of Public Utility Control. The purpose of this meeting is to examine potential ratemaking methodologies for the entry of electric vehicles. I would also like to discuss your concerns and comments regarding the two bills raised in both Commerce and Energy and Technology Committees addressing the advent of Electric Vehicles. I am also forwarding a link to the testimony received by the relevant committees on these bills. Thanks, have a good weekend.
