Re: Petition No. 1154 – Haddam Substation Modifications
   Landscaping Plan and Retaining Wall Details

Dear Chairman Stein:

On June 15, 2015, the Connecticut Siting Council ("Council") granted a declaratory ruling that a Certificate of Environmental Compatibility and Public Need would not be required for the work proposed by The Connecticut Light and Power Company doing business as Eversource Energy ("Eversource") in Petition No. 1154, subject to conditions. As a condition of the ruling, the Council required Eversource to:

- The facility owner/operator shall provide a landscape plan to improve aesthetics directly outside of the retaining wall including the aesthetic/architectural details of the retaining wall in order to further reduce its visual impact, and provide a copy of the plan to party, Fritz A. Dahlgren.

Eversource is submitting this letter, along with the attachment, to comply with the above condition.

Landscaping Plan and Retaining Wall Details
Eversource is providing the attached Landscaping Plan and Retaining Wall Details (the "Plans"). The Plans depict the installation of landscaping along the retaining wall and the detail design of the retaining wall. The Plans were reviewed with Mr. Dahlgren on July 14, 2015 and he is copied on this submittal. The landscaping will be installed at the completion of the substation modification, and associated line work and installation of the retaining wall.

Attached are an original and fifteen (15) copies.

Sincerely,

John Morissette
Project Manager - Transmission Siting - CT
