Disclaimer: Data on this list is compiled from manufacturers' data and fueleconomy.gov and is for general informational purposes only. All prices, technical data points and features and figures may vary based on model year and trim level. Please visit the specific manufacturer websites or ask your dealer for the latest information about each vehicle.

* The federal income tax credit is being lowered to \$3,750 for any Tesla Model 3 delivered between January 1, 2019 and June 30, 2019. The credit drops to \$1,875 for any Tesla Model 3 delivered between July 1, 2019 and December 31, 2019. The federal income tax credit is eliminated for any Tesla Model 3 delivered on or after January 1, 2020.

** The federal income tax credit is being lowered to \$3,750 for any Chevrolet Bolt or Volt delivered between April 1, 2019 and September 30, 2019. The credit drops to \$1,875 for any Chevrolet Bolt or Volt delivered between October 1, 2019 and March 31, 2020. The federal income tax credit is eliminated for any Chevrolet Bolt or Volt delivered on or after April 1, 2020.

Notes:

EV Range is the approximate distance that can be travelled on a fully charged battery using electricity only. Range can vary greatly depending on driving and environmental conditions.

Total Range is the approximate total electric and gas range of the vehicle. Range can vary greatly depending on driving and environmental conditions.

Charge Time indicates how long it takes to charge a fully empty battery using 240 volt electrical service (Level 2 charging). Use of lower voltage than that specified on the label, such as plugging into a standard 120v wall outlet, will result in longer charging times. The vehicle manufacturer should be able to provide complete information on charging times and the capabilities of their vehicles.
