Child Care During the Corona Crisis

The Office of Early Childhood is in close communication with the Governor, the Department of Public Health (DPH) and the state’s Emergency Operation Center. We are monitoring closely and will continue to communicate with you. These are unprecedented times. Child Care is a critical part of our infrastructure.

---

1. **Child Care Makes People Care Possible**
   Our communities rely on child care providers to support families, including those who play important roles during a crisis—such as first responders, medical professionals, and public service workers. We are grateful to our child care providers for their continued and increased efforts during this unprecedented time.

2. **It Takes a Village!**
   For parents who need to work, safe child care is essential. Look to trusted friends, neighbors, and family members who are not in a high-risk category to fill in care for children. When looking for support, remember to ask the following questions:
   - Have you traveled to a country that the CDC has issued a Level 2 or 3 travel designation in the last 14 days?
   - Have you had contact with anyone under investigation for COVID-19 in the last 14 days, or with anyone known to have COVID-19?
   - Do you have any symptoms of a respiratory infection (e.g. cough, sore throat, fever, or shortness of breath)?

3. **Keep Communication Open!**
   Tell your child care provider if your child will not be attending. This may open up temporary spaces for those in your community who need child care.

4. **Build Your Backup Plan!**
   For people without a backup child care plan, call 2-1-1 to find open and available spaces for care near your work or home.

If you are a healthcare worker or first responder and need care for your child while you work, please call this number (860) 756-0864.
Together for Kids

What Child Care Providers Are Doing
Child care providers truly care for children and want the best for your child. All licensed child care providers have implemented increased health care practices to prevent the spread of respiratory viruses. These practices include:

- Taking temperatures when children arrive
- Routinely sanitizing high touch surfaces
- Frequent handwashing
- Maintaining small groups only in one space
- Covering their mouth with their sleeve or a tissue when coughing or sneezing
- Avoiding touching their eyes, nose, or mouth with their hands
- Ensuring anyone showing signs of sickness stays home

For more information and resources, visit ct.gov/coronavirus. Or visit the CDC website cdc.gov/coronavirus/2019-nCoV/index.html for links to tip sheets, posters on handwashing, and tips and guidance for families. All CDC guidance is updated as necessary to respond to this changing situation.

We know these are trying times. We also know by working together, we will get through this together.
